Jackson, 2025-11-01 An updated review of post contact archaeology in the Upper Great Lakes region was long overdue In this comprehensive reassessment of recent and ongoing developments in the field Post Contact Archaeology of Michigan and the Upper Great Lakes Region examines the breadth and diversity of the area s archaeological sites highlighting the discoveries that are reshaping our understanding of post contact archaeology Gathering case studies that range from terrestrial and underwater cultural sites to the period of the earliest European settlement to the present day this volume spotlights how deeply interconnected excavation of the past and current social justice initiatives are [The Michigan Roadside Naturalist](#) J. Alan Holman, Margaret B. Holman, 2009-12-11 A captivating guide to the natural wonders of the Great Lakes State and a handy reference in our Michigan series [The Archaeology of Maritime Landscapes](#) Ben Ford, 2011-05-21 Maritime cultural landscapes are collections of submerged archaeological sites or combinations of terrestrial and submerged sites that reflect the relationship between humans and the water These landscapes can range in size from a single beach to an entire coastline and can include areas of terrestrial sites now inundated as well as underwater sites that are now desiccated However what binds all of these sites together is the premise that each aspect of the landscape cultural political environmental technological and physical is interrelated and can not be understood without reference to the others In this maritime cultural landscape approach individual sites are treated as features within the larger landscape and the interpretation of single sites add to a larger analysis of a region or culture This approach provides physical and theoretical links between terrestrial and underwater archaeology as well as prehistoric and historic archaeology consequently providing a framework for integrating such diverse topics as trade resource procurement habitation industrial production and warfare into a holistic study of the past Landscape studies foster broader perspectives and approaches extending the study of maritime cultures beyond the shoreline Despite this potential the archaeological study of maritime landscapes is a relatively untried approach with many questions regarding the methods and perspectives needed to effectively analyze these landscapes The chapters in this volume which include contributions from the United States the United Kingdom Norway and Australia address many of the theoretical and methodological questions surrounding maritime cultural landscapes The authors comprise established scholars as well as archaeologists at the beginning of their careers providing a healthy balance of experience and innovation The chapters also demonstrate parity between method and theory where the varying interpretations of culture and space are given equal weight with the challenges of investigating both wet and dry sites across large areas *Michigan* , 2017-11-23
