Pediatrics Rose W. Boynton,Geraldine R. Stephens,1998 Concise reference for nurse practitioners physician assistants and nurses involved in pediatric ambulatory care Outline format **Children, Young People and Care** John Horton,Michelle Pyer,2017-04-28 The very notions of childhood and youth are intimately connected to contemporary norms practices and spaces of care caring and care giving The provision of care is widely figured as both the primary responsibility of parents carers and practitioners who work with children and young people and the primary factor in shaping children and young people s development education socialisation wellbeing and contentment However children and young people themselves are

rarely figured as key actors in the provision of care. An overwhelming presumption that children and young people are to be cared for has effectively marginalised their agency and responsibilities as carers or in relation to practices and spaces of care. Bringing together a significant array of multidisciplinary work on children, young people and families, this collection draws together new research on the diverse lives and experiences of children and young people as carers, as cared for, and in relation to spaces and institutions of care. It is the first collection specifically devoted to the subject of care in relation to childhood and youth. As such, the book will be a key resource for academics, practitioners and students seeking leading edge empirical and conceptual material on this topic.

Handbook of Children, Culture, and Violence Nancy E. Dowd, Dorothy G. Singer, Robin Fretwell Wilson, 2006. Each chapter contains recommendations for legislators, policy makers, researchers and families. This book should be on the desk and minds of legislators, attorneys, social workers and other mental health professionals who encounter and wish to ameliorate the effects of violence in the lives of their young constituents, clients and patients.

JOURNAL OF CHILD AND FAMILY STUDIES

Questions relating to violence and children surround us in the media: should V-chips be placed in every television set? How can we prevent another Columbine school shooting from occurring? How should pornography on the internet be regulated? The *Handbook of Children, Culture, and Violence* addresses these questions and more, providing a comprehensive interdisciplinary examination of childhood violence that considers children as both consumers and perpetrators of violence as well as victims of it. The *Handbook* offers much needed empirical evidence that will help inform debate about these important policy decisions. Moreover, it is the first single volume to consider situations when children are responsible for violence rather than focusing exclusively on occasions when they are victimized. Providing the first comprehensive overview of current research in the field, the editors have brought together the work of a group of prominent scholars whose work is united by a common concern for the impact of violence on the lives of children. The *Handbook of Children, Culture, and Violence* is poised to become the ultimate resource and reference work on children and violence for researchers, teachers and students of psychology, human development and family studies, law, communications, education, sociology and political science, public policy. It will also appeal to policymakers, media professionals and special interest groups concerned with reducing violence in children's lives. Law firms specializing in family law as well as think tanks will also be interested in the *Handbook*.
