*Hard Knocks* Janice Haaken, 2010-06-10 This book draws on interviews carried out over a period of eight years as well as novels films and domestic violence literature to explain the role of storytelling in the history of the battered women's movement The author shows how cultural contexts shape how stories about domestic abuse get told and offers critical tools for bringing psychology into discussions of group dynamics in the domestic violence field The book enlists psychoanalytic feminist theory to analyse storytelling practices and to re visit four areas of tension in the movement where signs of battle fatigue have been most acute These areas include the

conflicts that emerge between the battered women's movement and the state the complex relationship between domestic violence and other social problems and the question of whether woman battering is a special case that differs from other forms of social violence The volume also looks at the tensions between groups of women within the movement and how to address differences based on race class or other dimensions of power Finally the book explores the contentious issue of how to acknowledge forms of female aggression while still preserving a gender analysis of intimate partner violence In attending to narrative dynamics in the history of domestic violence work *Hard Knocks* presents a radical re-reading of the contribution of psychology to feminist interventions and activism The book is ideal reading for scholars activists advocates and policy planners involved in domestic violence and is suitable for students of psychology social work sociology and criminology

**Gun Women** Mary Zeiss Stange, Carol K. Oyster, 2000-09-01 Women we are told should not own guns Women we are told are more likely to be injured by their own guns than to fend off an attack themselves This fact is rooted in a fundamental assumption of female weakness and vulnerability Why should a woman not be every bit as capable as a man of using a firearm in self defense And yet the reality is that millions of American women somewhere between 11 000 000 and 17 000 000 use guns confidently and competently every day Women are hunting using firearms in their work as policewomen and in the military shooting for sport and arming themselves for personal security in ever increasing numbers What motivates women to possess firearms What is their relationship to their guns And who exactly are these women Crucially can a woman be a gun owner and a feminist too Women's growing tendency to arm themselves has in recent years been political fodder for both the right and the left Female gun owners are frequently painted as trying to be like men the conservative perspective or capitulating to patriarchal ideas about power the liberal critique Eschewing the polar extremes in the heated debate over gun ownership and gun control and linking firearms and feminism in novel fashion Mary Zeiss Stange and Carol K Oyster here cut through the rhetoric to paint a precise and unflinching account of America's gun women

**Women and Guns** Deborah Homsher, 2015-05-20 This timely and provocative book looks at contemporary American women and their experiences with guns Scrupulously balanced this new paperback edition features a new appendix containing a wealth of primary source documents that help illuminate both the dangers and attractions of guns in our society

*Gender and Firearms* Peter Squires, 2024-04-01 Private gun ownership for self defense remains a major personal and public issue in the United States driven by concerns about crime vulnerability and a range of ideological factors including race and gender As media attention centres upon the extent to which women are taking up firearms with the gun lobby and firearms manufacturers celebrating the new armed woman and guns being promoted as Rape Prevention Kits this book explores the changing gendered aspects of gun ownership Can ownership of firearms by women be considered as some have claimed the embodiment of what might be termed pioneer feminism as women resist male violence in a dangerous world or are different stories told by the prominence of women in firearms control campaigns or the fact that women remain frequent victims of male gun ownership

Analysing representations of the armed woman in firearm and gun lobby marketing and advertising campaigns together with television and popular music forms *Gender and Firearms My Body My Choice My Gun* examines the directions taken in the public debate on weaponisation in the United States considering the role of women in the politics of gun safety and gun control The book draws on statistical evidence in order to shed light on trends in gun ownership whilst engaging with feminist scholarship on the relationship between gender violence risk and vulnerabilities thus opening up critical new debates surrounding identity performance gender and risk in contemporary societies As such the book will be of likely interest to sociologists and scholars of sociology criminology and cultural and media studies with interests in gender embodiment risk crime and violence     *Guns in America* Jan E. Dizard, Robert Muth, Stephen P.
