Safe Space How To Survive In A Threatening World:

What's Happened To The University? Frank Furedi, 2016-10-17 The radical transformation that universities are undergoing today is no less far reaching than the upheavals that it experienced in the 1960s However today when almost 50 per cent of young people participate in higher education what occurs in universities matters directly to the whole of society On both sides of the Atlantic curious and disturbing events on campuses has become a matter of concern not just for academics but also for the general public What is one to make of the growing trend of banning speakers What s the meaning of trigger warnings cultural appropriation micro aggression or safe spaces And why are some students going around arguing that academic freedom is no big deal What s Happened To The University offers an answer to the questions of why campus culture is undergoing such a dramatic transformation and why the term moral quarantine refers to the infantilising project of insulating students from offence and a variety of moral harms

How Fear Works

Frank Furedi, 2018-06-14 In 1997 Frank Furedi published a book called Culture of Fear It was widely acclaimed as perceptive and prophetic Now Furedi returns to his original theme as most of what he predicted has come true In How Fear Works Furedi seeks to explain two interrelated themes why has fear acquired such a morally commanding status in society today and how has the way we fear today changed from the way that it was experienced in the past Furedi argues that one of the main drivers of the culture of fear is unravelling of moral authority Fear appears to provide a provisional solution to moral uncertainty and is for that reason embraced by a variety of interests parties and individuals Furedi predicts that until society finds a more positive orientation towards uncertainty the politicisation of fear will flourish Society is continually bombarded with the message that the threats it faces are incalculable and cannot be managed or contained The ascendancy of this outlook has been paralleled by the cultivation of helplessness and passivity all this has heightened people s sense of powerlessness and anxiety As a consequence we are constantly searching for new forms of security both physical and ontological What are the drivers of fear what is the role of the media in its promotion and who actually benefits from this culture of fear These are some of the issues Furedi tackles to explain the current predicament He believes that through understanding how fear works we can encourage attitudes that will help bring about a less fearful future

Green Equilibrium Christopher Wills,2013-03-28 In *Green Equilibrium* Christopher Wills explains the rules by which ecosystems maintain a diversity of interdependent species in particular the balance of predators and prey Wills is both an eminent academic and a hugely experienced field biologist In presenting the concept of green equilibrium he draws on a fascinating range of examples including coral reefs off the densely populated Philippines the isolated and densely forested valleys of Papua New Guinea the changing Himalayan kingdom of Bhutan and a Californian ranch being allowed to return to a wild state In each case he assesses the impact of modern changes and attempts at conservation on these delicately balanced ecosystems Wills shows how human populations too are an integral part of the picture We now know from genetic evidence that over the course of history as humans spread out of Africa populations adapted as a result of environmental conditions Striking new evidence indicates that some human populations carry genes from past encounters with other hominids Neanderthals and Denisovans as well as genetic adaptations to local hazards such as malaria Wills argues that the most effective approaches to conserving green equilibria come out of evolutionary insights and from close involvement of the local communities who have lived and adapted to them
