Parliament,1975 Valuing Land Tenure Rights Food and Agriculture Organization of the United Nations,2018-10-05 The Food and Agriculture Organization of the United Nations FAO has developed a series of Technical Guides to elaborate and provide more detailed guidance on thematic areas contained within the Guidelines As part of this series this Technical Guide covers the issues associated with the identification and valuation of tenure rights for different purposes and provides guidance on how to ensure that valuations are undertaken in a fair reliable and transparent manner that comply with international norms It explains why valuations are important where and when they should be used and by whom It is not intended to be a valuation textbook instead it seeks to raise the level of awareness of valuation issues and procedures among those involved in land policy and administration and those affected by land tenure decisions Though this Technical Guide focuses on land it provides useful guidance that may be applied to fisheries forests and other natural resources It is directed primarily towards developing countries and countries in transition where there is less awareness of the valuation profession and institutions Legitimate tenure rights involving customary or informal tenure systems may be less clear and not formalized by law or regulations

Reclaiming the Land Sam Moyo,Paris Yeros,2013-07-04 Rural movements have recently emerged to become some of the most important social forces in opposition to neoliberalism From Brazil and Mexico to Zimbabwe and the Philippines rural movements of diverse political character but all sharing the same social basis of dispossessed peasants and unemployed workers have used land occupations and other tactics to confront the neoliberal state This volume brings together for the first time across three continents Africa Latin America and Asia an intellectually consistent set of original investigations into this new generation of rural social movements These country studies seek to identify their social composition strategies tactics and ideologies to assess their relations with other social actors including political parties urban social movements and international aid agencies and other institutions and to examine their most common tactic the land occupation its origins pace and patterns as well as the responses of governments and landowners At a more fundamental level this volume explores the ways in which two decades of neoliberal policy including new land tenure arrangements intended to hasten the commodification of land and new land uses linked to global markets have undermined the social reproduction of the rural labour force and created the conditions for popular resistance The volume demonstrates

the longer term potential impact of these movements In economic terms they raise the possibility of tackling immiseration by means of the redistribution of land and the reorganisation of production on a more efficient and socially responsible basis And in political terms breaking the power of landowners and transnational capital with interests in land could ultimately open the way to an alternative pattern of capital accumulation and development Institutional Logics and Practice of the Evolution of Urban-Rural Relationships Xiaoye Zhe,Yun Ai,2020-12-18 This book mainly analyzes the major issues at all phases of the transition of urban rural relation as well as measures adopted by the transition launcher in face of such issues including not only the system and policy design of the national and local government but the countermeasures of basic level units at urban and rural areas and the people Through reference of the social structure and social behavior it proposes opportunity structures interactive mechanism and behavior strategies for different periods which to some degree promotes the transition of urban rural relation and brings in new more complicated issues for the development It is under the impact of such new and existing issues that big problem follows when the urban rural relation steps onto a new stage showing several paths and practices different from the general urbanization and modernization theories Land Resources Information Systems in the Caribbean R.
