Saffron Walden S. R. Bassett,1982 **Archaeology, Economy, and Society** David A. Hinton,2022-05-18 This book examines the contribution of archaeology to the study of the social economic religious and other developments in England from the end of the Roman period at the start of the fifth century to the beginnings of the Renaissance at the end of the fifteenth century The first edition of the book was published in 1990 and remains the only synthesis of the whole spectrum of medieval archaeology This new edition is completely rewritten and extended but uses the same chronological approach to investigate how society and economy evolved It draws on a wide range of new data derived from excavation investigation of buildings metal detection and scientific techniques It examines the social customs economic pressures and environmental constraints within which people functioned the technology available to them and how they expressed themselves for example in their houses their burial customs their costume and their material possessions such as pottery Their adaptation to new circumstances whether caused by human factors such as the re emergence of towns or changing taxation requirements or by external ones such as volcanic activity or the Black Death is explored throughout each chapter The new edition of **Archaeology Economy and Society** will be essential reading for students and researchers of the archaeology of Medieval England Transformations of Identity and Society in Anglo-Saxon Essex Alexander Mirrington,2025-10-01 Transformations of Identity and Society in Anglo Saxon Essex A Case Study of an Early Medieval North Atlantic Community presents the results of a comprehensive archaeological study of early medieval Essex c AD 400 1066 This region provides an important case study for examining coastal societies of north western Europe Drawing on a wealth of new data the author demonstrates the profound influence of maritime contacts on changing expressions of cultural affiliation It is argued that this Continental orientation reflects Essex s longterm engagement with the emergent dynamic North Sea network The wide chronological focus and inclusive dataset enables long term socio economic continuity and transformation to be revealed These include major new insights into the construction of group identity in Essex between the 5th and 11th centuries and the identification of several previously unknown sites of exchange The presentation also includes the first full archaeological study of Essex under Viking rule **Essex Archaeology and History** ,1998 *Cultural Transition in the Chilterns and Essex Region, 350 AD to 650 AD* John T. Baker,2006 This comparison of the archaeological evidence from the fourth to seventh centuries AD in the Chilterns and Essex regions focuses on the considerable body of place name data from the area The counties of Hertfordshire Middlesex Essex and parts of Buckinghamshire Bedfordshire and Cambridgeshire are included

Anglo-Saxon England: Volume 12 Peter Clemons,Michael Lapidge,Simon Keynes,1986-04-17 Four very different kinds of Anglo Saxon thinking are clarified in this volume traditions learned and oral about the settlement of the country study of foreign language grammar interest in exotic jewels as reflections of the glory of God and a mainly rational attitude to

medicine Publication of no less than three discoveries augments our corpus of manuscript evidence The nature of Old English poetry is illuminated and a useful summary of the editorial treatment of textual problems in Beowulf is provided A re examination of the accounts of the settlement in Bede s Historia Ecclesiastica and the Anglo Saxon Chronicle yields insights into the processes of Anglo Saxon learned historiography and oral tradition A thorough going analysis of an under studied major work Bald s Leechbook demonstrates that the compiler perhaps in King Alfred s reign translated selections from a wide range of Latin texts in composing a well organized treatise directed against the diseases prevalent in his time The usual comprehensive bibliography of the previous year s publications in all branches of Anglo Saxon studies rounds off the book

Kingdom, Civitas, and County Stephen Rippon,2018 This book explores the development of territorial identity in the late prehistoric Roman and early medieval periods Over the course of the Iron Age a series of marked regional variations in material culture and landscape character emerged across eastern England that reflect the development of discrete zones of social and economic interaction The boundaries between these zones appear to have run through sparsely settled areas of the landscape on high ground and corresponded to a series of kingdoms that emerged during the Late Iron Age In eastern England at least these pre Roman socio economic territories appear to have survived throughout the Roman period despite a trend towards cultural homogenization brought about by Romanization Although there is no direct evidence for the relationship between these socio economic zones and the Roman administrative territories known as civitates they probably corresponded very closely The fifth century saw some Anglo Saxon immigration but whereas in East Anglia these communities spread out across much of the landscape in the Northern Thames Basin they appear to have been restricted to certain coastal and estuarine districts The remaining areas continued to be occupied by a substantial native British population including much of the East Saxon kingdom very little of which appears to have been Saxon By the sixth century a series of regionally distinct identities that can be regarded as separate ethnic groups had developed which corresponded very closely to those that had emerged during the late prehistoric and Roman periods These ancient regional identities survived through to the Viking incursions whereafter they were swept away following the English re conquest and replaced with the counties with which we are familiar today
