Resource Nationalism in Indonesia Eve Warburton, 2023-11-15 In *Resource Nationalism in Indonesia*, Eve Warburton traces nationalist policy trajectories in Indonesia back to the preferences of big local business interests. Commodity booms often prompt more nationalist policy styles in resource-rich countries. Usually, this nationalist push weakens once a boom is over. But in Indonesia, a major global exporter of coal, palm oil, nickel, and other minerals, the intensity of nationalist policy interventions increased after the early twentieth-century commodity boom came to an end. Equally puzzling, the state applied nationalist policies unevenly across the land and resource sectors. *Resource Nationalism in Indonesia* explains these trends by examining the economic and political benefits that accrue to domestic business actors when commodity prices soar. Warburton shows how the centrality of patronage to Indonesia's democratic political economy and the growing importance of mining and palm oil as drivers of export earnings enhanced both the instrumental and structural power of major domestic

companies giving them new influence over the direction of nationalist change The Spirit of Recovery Aji Prasetya Wibawa,2024-01-31 The scope of this book focuses on how information technology may assist in achieving goals and in providing solutions to problems such as a pandemic Research on the Internet and on technology has been done and the findings have applications in various sectors that rely on interdisciplinary knowledge This book explores and describes state of the art research conducted during the COVID 19 pandemic Topics covered include the IT viewpoint and the rules governing digital transformation throughout the pandemic The Digital Revolution sped up by a decade during COVID 19 which impacted both the user experience and that of software developers As a component of the digital transformation process this book explores the experiences of both the user and developer when attempting to change and adapt while utilizing an information technology program This book includes five topics 1 multidisciplinary artificial intelligence 2 Smart City and Internet of Things applications 3 game technology and multimedia applications 4 data science and business intelligence and 5 IT hospitality and information systems Each topic is covered in several book chapters with some application in several countries especially developing countries The chapters provide insight from contributors with different perspectives and several diverse fields who present new ideas and approaches to solving problems associated with the worldwide pandemic **Proceedings of the 8th International Research Conference on Economic and Business (IRCEB 2024)** Dediek Tri Kurniawan,Dede Rusmana,2025-06-27 This is an open access book This conference is one of our special annual events International Research Conference on Economics and Business is the premier forum for the international presentation of new advances and innovation research results in the fields of theoretical experimental and applied Business Economics and Education Research The conference will bring together leading researchers and scientists in the domain of interest from around the world **Globalization** Arjun Appadurai,2001-09-03 A special issue of PUBLIC CULTURE this volume of essays explores the experiences and political economies of globalization in various locales *Library of Congress Subject Headings* Library of Congress,2013 **Library of Congress Subject Headings** Library of Congress.
