**Sahel Facing the Future - Increasing Dependence Or Structural Transformation** Organisation for Economic Co-operation and Development, Permanent Inter-State Committee for Drought Control in the Sahel, 1988 **1978-1989**  
Heinz-Dietrich Fischer, 2020-01-20 No detailed description available for 1978 1989 *Beyond Territory and Scarcity*  
Quentin Gausset, Michael Anthony Whyte, Torben Birch-Thomsen, 2005 In this volume ten anthropologists and geographers critically address traditional Malthusian discourses in essays that attempt to move beyond territory and scarcity **World and Its Peoples** Marshall Cavendish, 2006-09 Describes the geography people culture and politics of the countries of the Middle East Central Asia and North Africa **Roots in the African Dust** Michael Mortimore, 1998-09-17 The image of Africa in the modern world has come to be shaped by perceptions of the drylands and their problems of poverty drought degradation and famine Michael Mortimore offers an alternative and revisionist thesis dismissing on theoretical and empirical grounds the conventional view of runaway desertification driven by population growth and inappropriate land use In its place he suggests a more optimistic model of sustainable land use based on researched case studies from East and West Africa where indigenous technological adaptation has put population growth and market opportunities to advantage He also proposes a more appropriate set of policy priorities to support dryland peoples in their efforts to sustain land and livelihoods The result is a remarkably clear synthesis of much of the best work that has emerged over past years

International Relations in Contemporary Africa Michael O. Anda, 2000 Although developing countries far outnumber fully industrialized states they are often neglected in the study of international relations especially with respect to the development of foreign policy theory International Relations in Contemporary Africa attempts to fill this void in the literature on comparative international relations while at the same time providing a detailed analysis of the economic development and integration of West African countries Michael Anda specifically focuses on the members of the Economic Community of West African States ECOWAS and their policies which encourage coordination on issues ranging from science and technology to diplomacy and mutual defense Tracing the diplomatic history of West Africa from independence to the present he assesses the various dimensions of cooperation among the smaller and less developed states of West Africa while revealing the precarious nature of the economy and security in the region Both detailed and comprehensive International Relations in Contemporary Africa represents a significant contribution to African studies that appeal to those with an interest in the foreign policy of smaller states **Africa's Recovery in the 1990s** Thandika Mkandawire, Rolf Van der Hoeven, 2016-07-27 While the design of adjustment policies in the latter part of the 1980s has generally shown greater attention to their impact on growth and social implications this book argues that several orthodox adjustment policies are still incongruent with long term development in Africa It goes on to discuss a development strategy which could lead to a much awaited economic recovery and improvement in social conditions in Africa in the 1990s drawing its conclusions from a

general theoretical discussion and national case studies

**The Revolution in Development Economics** James A.

Dorn, Steve H. Hanke, Alan A. Walters, 1998-04-01 For decades development economists believed that central planning not economic freedom was the key to economic growth in developing countries In 1956 Gunnar Myrdal winner of the Nobel Prize in economics in 1974 wrote The special advisers to underdeveloped countries who have taken the time and trouble to acquaint themselves with the problem all recommend central planning as the first condition of progress While the argument that socialism is the key to growth in the developing world appears obviously unreasonable today given the collapse of command and control economies around the globe it was when Myrdal wrote the academic consensus Only a few economists doubted such arguments and proposed alternatives Foremost among them was Peter Bauer author of such classics as The Economics of Under Developed Countries and Dissent on Development This book contains 20 essays many of which were originally published in the Cato Journal and a foreword by Vclav Klaus former prime minister of the Czech Republic
