Shakespeare's Ocean Daniel Brayton,2012 Study of the sea both in terms of human interaction with it and its literary representation has been largely ignored by ecocritics In Shakespeare s Ocean Dan Brayton foregrounds the maritime dimension of a writer whose plays and poems have had an enormous impact on literary notions of nature and in so doing plots a new course for ecocritical scholarship Shakespeare lived during a time of great expansion of geographical knowledge The world in which he imagined his plays was newly understood to be a sphere covered with water In vital readings of works ranging from The Comedy of Errors to the valedictory The Tempest Brayton demonstrates Shakespeare s remarkable conceptual mastery of the early modern maritime world and reveals a powerful benthic imagination at work **The Social Construction of Technological Systems** Wiebe E. Bijker,Thomas Parke Hughes,Trevor J. Pinch,Trevor Pinch,1989 The impact of technology on society is clear and unmistakeable The influence of society on technology is more subtle The 13 essays in this book have been written by a diverse group of scholars united by a common interest in creating a new field the sociology of technology They draw on a wide array of case studies from cooking stoves to missile systems from 15th century Portugal to today s AI labs to outline an original research program based on a synthesis of ideas from the social studies of science and the history of technology Together they affirm the need for a study of technology that gives equal weight to technical social economic and political questions Back cover *Five Egyptian Goddesses* Susan Tower Hollis,2019-10-03 This volume explores the earliest appearances and functions of the five major Egyptian goddesses Neith Hathor Nut Isis and

Nephthys Although their importance endured throughout more than three millennia of ancient Egyptian history their origins earliest roles and relationships in religion myth and cult have never before been studied together in detail Showcasing the latest research with carefully chosen illustrations and a full bibliography Susan Tower Hollis suggests that the origins of the goddesses derived primarily from their functions as shown by their first appearances in the text and art of the Protodynastic Early Dynastic and Old Kingdom periods of the late fourth and third millennia BCE The roles of the goddess Bat are also explored where she is viewed both as an independent figure and in her specific connections to Hathor including the background to their shared bovine iconography Hollis provides evidence of the goddesses close ties with royalty and in the case of Neith her special connections to early queens Vital reading for all scholars of Egyptian religion and other ancient religions and mythology this volume brings to light the earliest origins of these goddesses who would go on to play major parts in later narratives myths and mortuary cult
