Sails Of Tau Ceti:

The Sails of Tau Ceti Michael McCollum, 2020-10-01 Starhopper was humanity's first interstellar probe. It was designed to search for intelligent life beyond the solar system. Before it could be launched, however, intelligent life found Earth. The discovery of an alien light sail inbound at the edge of the solar system generated considerable excitement in scientific circles. With the interstellar probe nearing completion, it gave scientists the opportunity to launch an expedition to meet the aliens while they were still in space. The second surprise came when Starhopper's crew boarded the alien craft. They found beings who, despite their alien physiques, were surprisingly compatible with humans. That two species so similar could have evolved a mere twelve light years from one another seemed too coincidental to be true. One human being soon discovered that coincidence had nothing to do with it. The Sails of Tau Ceti Michael McCollum, 1992

Space Sailing Jerome L. Wright, 1992 Wright was one of the first to introduce the concept of propulsion using light pressure. He reports on his continuing work mostly at the Jet Propulsion Laboratory in Pasadena for scientists, engineers, and space enthusiasts with little technical background. The first space sailors are probably in junior high now. Printed on acidic paper. Annotation copyrighted by Book News Inc. Portland, OR

Procyon's Promise Michael McCollum, 2020-02-04 For millennia, the Makers' Life Probes explored the farthest reaches of space in search of the secret behind faster-than-light speed. In the 22nd century, the people of Earth made a pact with this far-flung civilization: all of the Makers' intelligence in exchange for help in their mission. Three hundred years later, descendants of the original Procyon expedition have returned to Earth in a starship. They find a world that has forgotten the generations-old contract. No matter. The returning colonists have overcome far greater obstacles in their single-minded drive to redeem a promise made before any of them were born.

Alpha Centauri Martin Beech, 2014-10-15 As our closest stellar companion and composed of two Sun-like stars and a third small dwarf star, Alpha Centauri is an ideal testing ground of astrophysical models and has played a central role in the history and development of modern astronomy, from the first guesses at stellar distances to understanding how our own star, the Sun, might have evolved. It is also the host of the nearest known exoplanet, an ultra-hot Earth-like planet recently discovered just 4.4 light years away. Alpha Centauri is also the most obvious target for humanity's first directed interstellar space probe. Such a

mission could reveal the small scale structure of a new planetary system and also represent the first step in what must surely be humanity's greatest future adventure exploration of the Milky Way Galaxy itself For all of its closeness Centauri continues to tantalize astronomers with many unresolved mysteries such as how did it form how many planets does it contain and where are they and how might we view its extensive panorama directly In this book we move from the study of individual stars to the study of our Solar System and our nearby galactic neighborhood On the way we will review the rapidly developing fields of exoplanet formation and detection Euclid's Wall Michael McCollum, 2020-10-01 A century after

civilization fell in a day and a night of tectonic cataclysm scattered communities have regained a fraction of what humanity lost on that Day of Destruction One such is the Duchy of Hampshire on the southern tip of England Hampshire is at war with the Califat de Normandie It is a war that has been profitable for merchant sea captain Ethan Scott of the Sailing Barque Hellespont Despite the money to be made Scott prays for the war to end Each time he puts to sea he risks his ship and the lives of his crew on his ability to evade the Norman raiders in the Channel and the Eirish Sea It is a gamble he will inevitably lose if he keeps at it too long The Duke of Hampshire has problems of his own War is expensive If he doesn't find additional resources soon he will be defeated The Duke plans to send an expedition to North America to discover whether the fabled wealth of old still exists there For that he needs a ship Scott's chance meeting with a beautiful woman presents both men with the solution to their respective problems Soon Hellespont sets sail for America and the mysterious Wall that scholars believe precipitated the fall of civilization and which may yet destroy the world **Gibraltar Stars** Michael

McCollum, 2019-11-18 The great debate is over The human race has rejected the idea of retreating to Earth and that the Broa will continue to overlook them at least for a few more generations Instead the World Parliament by a 60-40 vote has decided to throw the dice and go for a win Brave words echo in Parliament Hall as members declare a victory inevitable While plans for war mount on Earth Mark and Lisa Rykand face grave danger as spies in enemy territory The Broa have begun to scrutinize these strange two-legged interlopers and question their intentions It's only a matter of time before their identities are revealed But the Rykands' mission is key to securing a victory With the number of forces favoring the enemy by roughly a million to one Earth will need all the help they can get **Antares Passage** Michael McCollum, 2019-05-01 After more than

a century of isolation the paths between stars are again open and the people of Alta in contact with their sister colony on Sandar And yet the opening of the foldlines has not been the pure blessing the Altans had supposed The reestablishment of interstellar travel has brought with it news of the encroaching Ryall an alien race whose goal is the extermination of humanity If they are to avoid defeat at the hands of the alien forces Alta must seek out the military might of Earth The only suitable path however requires a journey into the heart of a supernova **The Clouds of Saturn** Michael

McCollum, 2020-10-01 When the sun flared out of control and boiled Earth's oceans humanity took refuge in a place that few would have predicted In the greatest migration in history the entire human race took up residence among the towering

clouds and deep clear air canyons of Saturn's upper atmosphere Having survived the traitor star they returned to the all too human tradition of internecine strife The new city states of Saturn began to resemble those of ancient Greece with one group of cities taking on the role of militaristic Sparta **Lost Earth** Michael McCollum,2020-11-16 A Galaxy Reborn It is the 43rd century and humanity occupies a substantial chunk of the Orion Spur the small galactic arm in which Sol is located Homo sapiens Terra has become Homo sapiens Galactica Following the invention of faster than light travel in 2530 the Great Hegira went from a trickle to a flood as human occupied space expanded at an exponential clip Over the centuries rivalries grew as did star system navies When widespread war finally came it raged across entire sectors Mass bombardments of enemy planets took their toll Much that had been built during the preceding thousand years was smashed in flashes of nuclear fusion A dark age descended Eventually a new Pax Galactica took hold The return of stability brought with it a renaissance Much knowledge that had been lost was regained Much but not all On worlds across human space parents told their children stories of a place where once dwelt knights and princesses magicians and dragons where bold warriors sallied forth to victory or defeat What the children did not learn was where this magical place could be found The years of chaos had robbed them of that information The stellar coordinates of Sol were lost And with them the location of Planet Earth

Antares Dawn Michael McCollum,2019-05-01 When the supergiant star Antares exploded in 2512 the human colony on Alta found their pathway to the stars gone isolating them from the rest of human space for more than a century When a powerful warship materializes in the system without warning the commanders of the Altan Space Navy are alarmed They dispatch one of Alta's most powerful ships to investigate only to discover the unknown behemoth is battered and helmed by a dead crew This is disturbing news for the Altans as the defeated battleship would have easily defeated the whole of the Altan navy on its own And if that ship was able to stumble into the Altan system so too could the force responsible for its destruction Something must be done *Thunderstrike!* Michael McCollum,2020-10-01 The new comet found near Jupiter was an incredible treasure trove of water ice and rock Immediately the water starved Luna Republic and Sierra Corporation a leader in asteroid mining were squabbling over rights to the new resource But all thoughts of profit and fame were abandoned when a scientific expedition discovered that the comet's trajectory placed it on a collision course with Earth As scientists struggled to find a way to alter the comet's course world leaders tried desperately to restrain mass panic and two lovers quarreled over the direction the comet was to take all Earth waited to see if humanity had any future at all **Antares Victory** Michael McCollum,2019-05-01 After a century of warfare humanity finally discovered the Achilles heel of the Ryall their xenophobic reptilian foe Spica Alpha Virginis is the key star system in enemy space It is the hub through which all Ryall starships must pass and if Alta and their allies can just capture and hold it they will strangle the Ryall war machine and end its threat to humankind forever It all seemed so simple in the computer simulations Advance by stealth attack without warning strike swiftly with overwhelming power Unfortunately the logistics prove to be the easy part With the key to victory

in hand Richard and Bethany Drake must temper the volatile role of human nature if they are to bring down the alien foe

Aurora Kim Stanley Robinson,2015-07-07 A major new novel from one of science fiction s most powerful voices Aurora tells the incredible story of our first voyage beyond the solar system Brilliantly imagined and beautifully told it is the work of a writer at the height of his powers Our voyage from Earth began generations ago Now we approach our new home AURORA

Noah's Arkive

Jeffrey J. Cohen,Julian Yates,2023-06-13 A timely rethinking of the archetypal story of Noah the great flood and who was left

behind as the waters rose Most people know the story of Noah from a children s bible or a play set with a colorful ship bearded Noah pairs of animals and an uncomplicated vision of survival Noah s ark however will forever be haunted by what it leaves to the rising waters so that the world can begin again In Noah s Arkive Jeffrey J Cohen and Julian Yates examine the long history of imagining endurance against climate catastrophe as well as alternative ways of creating refuge They trace how the elements of the flood narrative were elaborated in medieval and early modern art text and music and now shape writing and thinking during the current age of anthropogenic climate change Arguing that the biblical ark may well be the worst possible exemplar of human behavior the chapters draw on a range of sources from the Epic of Gilgamesh and Ovid s tale of Deucalion and Pyrrha to speculative fiction climate fiction and stories and art dwelling with environmental catastrophe Noah s Arkive uncovers the startling afterlife of the Genesis narrative written from the perspective of Noah s wife and family the animals on the ark and those excluded and so left behind to die This book of recovered stories speaks eloquently to the ethical and political burdens of living through the Anthropocene Following a climate change narrative across the millennia Noah s Arkive surveys the long history of dwelling with the consequences of choosing only a few to survive in order to start the world over It is an intriguing meditation on how the story of the ark can frame how we think about environmental catastrophe and refuge conservation and exclusion offering hope for a better future by heeding what we know from the past

The Bastard Legion Gavin G. Smith, 2017-01-26 High octane SF adventure with Smith s trademark twist Jamie Sawyer An exceptional talent Peter F Hamilton Four hundred years in the future the most dangerous criminals are kept in suspended animation aboard prison ships and rehabilitated in a shared virtual reality environment But Miska Corbin a thief and hacker with a background in black ops has stolen one of these ships the Hangman s Daughter and made it her own Controlled by explosive collars and trained in virtual reality by the electronic ghost of a dead marine sergeant the thieves gangsters murderers and worse are transformed into Miska s own private indentured army the Bastard Legion Are the mercenaries just for fun and profit or does Miska have a hidden purpose connected to her covert past Gloriously action packed and often brutal military SF adventure This series launch will keep readers turning pages eager to see what bloody adventure awaits and how the legion develops into a force to be reckoned with Publishers Weekly **STARRED REVIEW**
