Avignon and Its Papacy, 1309-1417 Joëlle Rollo-Koster, 2015-08-20 With the arrival of Clement V in 1309 seven popes ruled the Western Church from Avignon until 1378 Joëlle Rollo Koster traces the compelling story of the transplanted papacy in Avignon the city the popes transformed into their capital Through an engaging blend of political and social history she argues that we should think more positively about the Avignon papacy with its effective governance intellectual creativity and dynamism It is a remarkable tale of an institution growing and defending its prerogatives of people both high and low who produced and served its needs and of the city they built together As the author reconsiders the Avignon papacy 1309 1378 and the Great Western Schism 1378 1417 within the social setting of late medieval Avignon she also recovers the city's urban texture the stamp of its streets the noise of its crowds and celebrations and its people's joys and pains Each chapter focuses on the popes their rules the crises they faced and their administration but also on the history of the city considering the recent historiography to link the life of the administration with that of the city and its people The story of Avignon and its inhabitants is crucial for our understanding of the institutional history of the papacy in the later Middle Ages The author argues that the Avignon papacy and the Schism encouraged fundamental institutional changes in the governance of early modern Europe effective centralization linked to fiscal policy efficient bureaucratic governance court society *soci t de cour*
