Sally Ride was born on May 26, 1951, in Los Angeles, California. She grew up to become a pioneer at the world of space exploration and a symbol of scientific achievement for many. She was the first woman to fly in space, inspiring gender equality and inspiring generations of young scientists and astronauts.

She graduated with honors from UC Berkeley in 1973, where she studied physics and astronomy. She then earned a master's degree and a Ph.D. in astrophysics, becoming the first American woman to do so. Her research focused on the interaction between stars and interstellar clouds.

In 1978, Sally Ride made history when she was selected as one of the first female astronauts. The mission chosen for her was the first shuttle flight, STS-7, the Space Shuttle Columbia. On June 18, 1983, Sally Ride launched on her first mission, joining two other women on the shuttle. During her time in orbit, she operated the shuttle's instruments and conducted several experiments.

After returning, Sally Ride continued her work in science, specifically in the field of planetary science. She worked on STS-7 education, advocating for young girls. She co-founded the first girls' science organization, which aimed to inspire and empower young women in science, technology, engineering, and mathematics through hands-on, hands-on projects and educational materials. Her organization made significant contributions to girls' science education.
