The Saltwater Wetland Pam Walker, Elaine Wood, 2009 It is only natural for people to be fascinated by the sea Life originated in the oceans and more than one half of the people on Earth reside within 50 miles of the sea However even though we have sent explorers to the moon and other regions of space we still know little about the frontier that surrounds us The engaging new Life in the Sea set provides young readers with current accessible information about the sea and its creatures This comprehensive resource on the ocean s inhabitants presents living things in their physical habitats emphasizing the relationship between marine biology and marine ecology Each volume focuses on one specific area of the marine world discussing its physical characteristics the living things found there and the impact humans have on the area The perfect companion to Facts On File s Life On Earth set see facing page this invaluable reference presents a well rounded view of marine life Salt Water Josep Pla, 2020-12-01 Peter Bush winner of the Ramon Llull Prize for Literary Translation brings to English this most prolific and influential of Catalan writers Dripping with a panache that can turn in a comic instant to the most conciliatory humility Josep Pla s foray into the land and sea most familiar to him will plunge readers head first into its mysterious and often tasty depths Here are adventures and shipwrecks raspy storytellers and the fishy meals that sustain them After describing the process of beating an octopus with branches to soften up its flesh Pla writes These are
