Shaping a Nation Stephen M. Lyon, Iain R. Edgar, Ali Khan, 2010 The key to transforming a society into what it should be is apparently linked inextricably to education This book draws the attention of readers to the implications of formal education for the state as a powerful tool that can convert the mindset of the masses The book is particularly pertinent in view of how education is being used and misused in Pakistan especially with reference to religious education The contributors subscribe to a generally positive view of education and support efforts at widening access to formal education both in the richer and poorer parts of the world They recognise however that education comes with consequences Some perhaps most of these may be perceived as beneficial but some of those consequences are undesirable and can be highly damaging to a particular population or segment of a population Thus it is clear that while literacy in Pakistan has slowly but steadily improved there has been a corresponding level of social fragmentation and dissatisfaction within the country To illustrate their viewpoints the contributors examine the impact of General Zia's Islamisation programmes on education in the 1980s General Zia's government tinkered with education in such profound ways that those programmes continue to shape the scope of what is possible within formal education in Pakistan Thus this volume includes discussions of formal religious schools in Pakistan The authors also examine the wide rift between the various state funded and private schooling opportunities available in Pakistan State funded

education currently lags behind the agreed goals set out by the UN in their Millennium Development Goals and this inadequate provision of state funded education has left a vacuum for other groups to move in and introduce rival pedagogical agendas. All of the contributions in this volume focus on particular aspects of education across Pakistan. Some are ethnographic and anthropological, some historical, some pedagogical, some are clearly influenced by social policy agendas. They seek to identify a number of very real and complex sets of issues involved in providing high quality and mass education across Pakistan. The language of instruction, the source of financing, the nationalist and religious agendas embedded within the curricula, gender role expectations and impositions, the historical legacies which have shaped the educational environment are all touched upon. Nestled in amongst the complex issues are examples of very high quality education and dedicated educationalists who achieve little miracles every day. Thus this volume portrays a range of views on how education in Pakistan is what it could be and perhaps most importantly what it ought to be. **The Nation Takes Shape** Marcus

Brudny, 2009-06-30 What caused the emergence of nationalist movements in many post communist states What role did communist regimes play in fostering these movements Why have some been more successful than others To address these questions Yitzhak Brudny traces the Russian nationalist movement from its origins within the Russian intellectual elite of the 1950s to its institutionalization in electoral alliances parliamentary

factions and political movements of the early 1990s Brudny argues that the rise of the Russian nationalist movement was a combined result of the reinvention of Russian national identity by a group of intellectuals and the Communist Party's active support of this reinvention in order to gain greater political legitimacy The author meticulously reconstructs the development of the Russian nationalist thought from Khrushchev to Yeltsin as well as the nature of the Communist Party response to Russian nationalist ideas Through analysis of major Russian literary political and historical writings the recently published memoirs of the Russian nationalist intellectuals and Communist Party officials and documents discovered in the Communist Party archives Brudny sheds new light on social intellectual and political origins of Russian nationalism and emphasizes the importance of ideas in explaining the fate of the Russian nationalist movement during late communist and early post communist periods
