Highpoints Zohar Eitan, 2016-11-11 In *Highpoints* Zoltan Eitan investigates a universal melodic phenomenon the melodic peak in Western repertoires ranging from eighteenth century Galant music to twentieth century Expressionism Using hard statistical analysis Eitan examines the rhythmic melodic harmonic and dynamic configurations associated with contour peaks in the music of Haydn Chopin and Berg three composers of decidedly different musical casts This empirical examination serves as a starting point in Eitan's exploration of the structural and expressive functions of melodic shape in these diverse bodies of music Melodic contour has received increasing attention from psychologists music theorists and ethnomusicologists partially because unlike functional tonal relationships it is a universal facet of auditory patterning and may be strongly related to primeval natural aspects of perception By focusing on this elemental aspect rather than on pitch syntax or conventional form the author provides fresh insights into the work of the individual composers he discusses as well as an innovative approach to broad issues of musical style and style change *Highpoints* concludes with a discussion drawing on empirical findings of melodic gesture and syntax as distinct independent dimensions of style style boundaries and style change
