Shattered Self A Psychoanalytic Study Of Trauma:

The Shattered Self Richard B. Ulman, Doris Brothers, 2013-05-13 Ulman and Brothers utilize a unique clinical research population of rape and incest victims and Vietnam combat veterans to argue that trauma results from real occurrences that have as their unconscious meaning the shattering of central organizing fantasies of self in relation to selfobject Their innovative treatment approach revolves around the transformation of these shattered fantasies in the intersubjective context of the transference countertransference neurosis **A New Vision of Psychoanalytic Theory, Practice and Supervision**

Doris Brothers, Jon Sletvold, 2023-04-28 By viewing psychoanalysis through the lens of embodiment Brothers and Sletvold suggest a shift away from traditional concept based theory and offer new ways to understand traumatic experiences to describe the therapeutic exchange and to enhance the supervisory process Since traditional psychoanalytic language does not readily lend itself to embodied experience the authors place particular emphasis on the words I you we and world to describe the flow of human attention Offering new insights into trauma this book demonstrates how traumatic experiences and efforts to regain certainty in one's psychological life involve profound disruptions of this flow With a new understanding of transference resistance and interpretation the authors ultimately show how much can be gained from viewing the analytic exchange as a meeting between foreign bodies Grounded in detailed case material this book will change the way therapists from all disciplines understand the therapeutic process and how viewing it in terms of talking bodies enhances their efforts to heal
