Look At Earth:

Looking into the Earth Alan E. Mussett, M. Aftab Khan, 2000-10-23 *Looking Into the Earth* comprehensively describes the principles and applications of both global and exploration geophysics on all scales. It forms an introduction to geophysics suitable for those who do not necessarily intend to become professional geophysicists including geologists, civil engineers, environmental scientists and field archaeologists. The book is organised into two parts. Part 1 describes the geophysical methods while Part 2 illustrates their use in a number of extended case histories. Mathematical and physical principles are introduced at an elementary level and then developed as necessary. Student questions and exercises are included at the end of each chapter. The book is aimed primarily at introductory and intermediate university students taking courses in geology, earth science, environmental science and engineering. It will also form an excellent introductory textbook in geophysics departments and will help practising geologists, archaeologists and engineers understand what geophysics can offer their work. **Earth observing system**, 1987 **To See the Earth Before the End of the World** Ed Roberson, 2012-02-08 Winner of the Voelcker Award PEN America 2016 In *To See the Earth Before the End of the World* Ed Roberson presents us with 120 new poems each speaking in his unique voice and seen through his unique eye. Earth and sky, neighborhood life and ancient myths, the art of seeing and the architecture of the imagination are all among the subjects of these poems. Recurring images and ideas construct a complex picture of our world, ourselves and the manifold connections tying them together. The poems raise large questions about the natural world and our place in it and they do not flinch from facing up to those questions. Roberson's poems range widely through different scales of time and space, invoking along the way history and myth, galaxies and garbage trucks, teapots and the history of photography, mating cranes and Chicago's political machine. This collection is composed of five sequences each developing a particular constellation of images and ideas related to the vision of the whole. Various journeys become one journey, an epic journey invoking epic themes. There are songs of creation, pictures of the sorrows of war, celebrations of human labor and human society, a respect for tools and domestic utensils that are well made, the deep background of the past tingeing the colors of the present and the tragic tones of endings and laments, a pervading awareness of the tears in things. Most of all, there is the exhilaration of a grand sweeping vision that enlarges our world. Planet Earth Encyclopaedia Britannica, Inc., 2012-04-01 Updated for 2012 and part of the Britannica Learning Library Series in *Planet Earth* one will discover answers to these questions and many more. Through pictures, articles, fun facts one will travel around the world seeing the highest and the lowest, the hottest and the coldest and the strangest and most beautiful places on Earth. The Earth in Space Edward Payson Jackson, 1887 Savaged Earth A. R. disappears one day Proteus can't bear the loss and he sets off in pursuit of answers Thus starts a surreal philosophically maddening quest for meaning Chasing the elusive Mosquito leads Proteus to in between worlds where things do not quite hold together and where the living and the dead must learn to live in and out of the boundaries of time The further he gets from sanity the closer he comes to something that may turn out to be wisdom Playful but unapologetically challenging New People of the Flat Earth is a breathtakingly original novel that defies categorisation or summary
