

WARM WEATHER TIPS WATER SAFETY

LEARN WATER COMPETENCE

Know your limitations! Never swim alone. If possible, choose locations with lifeguards on watch. Be aware of environmental risks (tides, currents, rip currents, shallow and unclear water). Check conditions before you go!

LEARN SWIMMING SKILLS

Find a swim class for you or your child's skill level. Learn 5 skills recommended by the red cross in different environments:
1. Enter water that's over your head, and return to the surface. 2. float for 1 minute. 3. Turn over and around in water. 4. Swim 25 yards. 5. Exit the water.

BE ALERT TO HELP OTHERS

Pay close attention to weak swimmers and children. Know the signs of drowning. Take CPR and first aid classes. Designate an adult to be the 'water watcher', to keep their eye on those in the water at all times.

USE LAYERS OF PROTECTION

Ensure there are barriers between vulnerable people and danger. Teach children to always ask permission before going into water. Lifejackets are recommended for all. At home, fence in pools or water features for added barriers.

KNOW SIGNS OF DISTRESS

A swimmer may need help if: they are not making forward progress. Are vertical in water and not making progress. They are bobbing in water and quiet. Their mouth may be at water level, they are swimming in a ladder climbing motion.

IN CASE OF EMERGENCY

If anyone is unaccounted for, always check water first. Immediately alert life guards. Know and be able to recognize the signs of distress. Do not attempt a rescue if you are not a strong swimmer. Use the "reach or throw, don't go" method of rescue.

PREPARE

The more you learn and prepare, the more likely you are to avoid water emergencies. Find more information and resources at:

Look Out Water Safety:

GLOBAL HANDBOOK ON FOOD AND WATER SAFETY Sonia Y. De Leon, Susan L. Meacham, Virginia S.

Claudio, 2003-01-01 This book is a practical reference on food and water safety that will be useful for food managers, trainers, educators, food handlers, and consumers worldwide. The first two chapters emphasize the importance of food and water safety on health and life maintenance. Each chapter has an introductory paragraph that states the objective and scope of the chapter text. Definitions of useful terms, tables, and illustrations serve to make the key points better understood and easier to remember. Review questions at the end of each chapter enhance the learning experience, and the chapter references will give the reader a chance to delve into areas of interest for further information. A very unique feature of this book is the segment on foodborne disease outbreaks. A selection of fifty cases are presented that provide important learning tools for problem solving and evaluating foodborne illnesses. Water safety is explained in great detail whether it is used for drinking and cooking or in recreational water facilities. Numerous examples of etiologic agents that cause illness from contaminated food and water are discussed. Guidelines to supply safe food and water for emergencies that include preparedness in case of bioterrorism, power outage, floods, hurricanes, and other disasters are given. Practical guidelines about food and water safety when handling foods throughout the food chain are explored in each chapter. In addition, a glossary of terms commonly used in food and water safety with cross references to the chapter contents is included. In light of global trade and increasing cultural diversity in food consumption, this book also deals with challenges for the future to ensure a safe water and food supply.
