Portugali, 2011-07-06 *Complexity Cognition and the City* aims at a deeper understanding of urbanism while invoking on an equal footing the contributions both the hard and soft sciences have made and are still making when grappling with the many issues and facets of regional planning and dynamics In this work the author goes beyond merely seeing the city as a self organized emerging pattern of some collective interaction between many stylized urban agents he makes the crucial step of attributing cognition to his agents and thus raises for the first time the question on how to deal with a complex system composed of many interacting complex agents in clearly defined settings Accordingly the author eventually addresses issues of practical relevance for urban planners and decision makers The book unfolds its message in a largely nontechnical manner so as to provide a broad interdisciplinary readership with insights ideas and other stimuli to encourage further research with the twofold aim of further pushing back the boundaries of complexity science and emphasizing the all important interrelation of hard and soft sciences in recognizing the cognitive sciences as another necessary ingredient for meaningful urban studies

Technology and Culture Allen W. Batteau, 2009-06-09 Technology and Culture provides a comprehensive overview of anthropological and other theories examining the place of technology in culture and the consequences of technology for cultural evolution The book develops and contrasts anthropological discourse of technology and culture with humanistic and managerial views It uses core anthropological concepts including adaptation evolution totemic identity and collective representations to locate a broad variety of technologies ancient and modern in a context of shared understandings and misunderstandings The author draws on his own experience as an auto mechanic computer programmer ethnographer and aircraft pilot to demonstrate that technologies are cultural creations encoding and accelerating the dreams and delusions of
