H. Dekker, 2024-04-04 This book gives you the historical sensation of coming face to face with the bodily expression and regulation of children s emotions over time The study does this by encouraging you to look through the eyes of well known artists like Albrecht Dürer Domenico Ghirlandaio Jan Steen Antony van Dyck Rembrandt and Titian in early modern Europe and Jean Baptiste Simón Chardin Thomas Lawrence Jean Honor Fragonard Philipp Otto Runge Willem Bartel van der Kooi Paul Gauguin Auguste Renoir and

Jozef Israëls in the late 18th and 19th centuries. These sources are supplemented by works from less famous artists as well as popular emblem books, child advice manuals, observations from the emerging child sciences, and personal documents. Jeroen Dekker observes children's emotions mainly in the child's world and in the domestic emotional space and connects them with history's ongoing underlying discourse on education and the emotions. This discourse was developed by theologians, philosophers, and moralists like Augustine, Aquinas, Erasmus, Descartes, Jacob Cats, John Locke, and Jean-Jacques Rousseau, by Romantic educationalists like Friedrich Fröbel and Ellen Key, and by scientists like Charles Darwin and William James, who emphasized the biological instead of the moral fundament of children's emotions. The story of children's emotions is told in the context of cultural movements like the Renaissance, Humanism, the Reformation, the Enlightenment, Romanticism, and the starting Age of Child Science. Children's Emotions in Europe 1500-1900 crucially highlights the continuous co-existence of regulation-oriented and child-oriented educational views on children's emotions.

Nature Education with Young Children Daniel R. Meier, Stephanie Sisk-Hilton, 2013-05-29. Nature Education with Young Children is a thoughtful, sophisticated teacher resource that blends theory and practice on nature education, children's inquiry-based learning, and reflective teaching. The book's guiding conceptual framework is founded upon the integration of four key ideas for effective and transformative nature education: The power and value of equity and access to nature education; Effective teaching encompasses child development domains and integrates ECE curriculum; Children learn best through inquiry-based and child-centered teaching; Powerful teaching is founded upon teacher inquiry and reflection. Implementing nature study is one critical way that educators can integrate more science learning across the ECE curriculum and do so in an active discovery-based manner. Nature Education with Young Children strives for an American version of what the Reggio Emilia educators do so well, creating a seamless integration of science concepts into the daily intellectual investigations that occur in classrooms everywhere.
