Looking For Los Angeles:

Looking for Los Angeles Charles G. Salas, Michael S. Roth, 2001 In *Looking for Los Angeles* 12 contributors present their responses to the world's newest major city. A variety of perspectives and approaches are covered. The text balances the importance of place with the importance of culture. *Los Angeles Magazine*, 1996-05 *Los Angeles Magazine* is a regional magazine of national stature. Our combination of award-winning feature writing, investigative reporting, service journalism, and design covers the people, lifestyle, culture, entertainment, fashion, art, and architecture and news that define Southern California. Started in the spring of 1961, *Los Angeles Magazine* has been addressing the needs and interests of our region for 48 years. The magazine continues to be the definitive resource for an affluent population that is intensely interested in a lifestyle that is uniquely Southern Californian. *Los Angeles Magazine*, 1996-03 *Los Angeles Magazine* is a regional magazine of national stature. Welter, 2025-11-18 The first English language volume to explore the work of architect Leopold Fischer and the inaugural study of his California legacy. In 1936, Leopold Fischer, 1901-1975, in exile from Nazi Germany, arrived in California where he created a small but distinct oeuvre of mostly domestic architecture. In contrast to his famous peers, Rudolph Schindler and Richard Neutra, immigrants whose Southern California buildings are frequently examined and who like Fischer studied with the modernist architect Adolf Loos, Fischer and his California structures have until now escaped the attention of architectural history. *Exiled in L.A.* examines Fischer's important yet overlooked contributions to Southern California architecture. As the whereabouts of Fischer's archives remain

unknown Volker M Welter grounds the designer's California works in comparison with his pre-exile projects and the compositions of fellow architects in California. In the 1920s Fischer created experimental working class housing estates in Germany that pioneered ecological construction and living practices. Comparable to their predecessors, Fischer's California buildings revolve around the functioning of the organization of a home as he defined domestic architecture in 1926. Featuring new photography and detailed architectural plans, this book is an original contribution to the literature on Southern California's built heritage. Catalogue of Copyright Entries ... The Magic of Reality Richard Dawkins,2011-10-04 Magic takes many forms Supernatural magic is what our ancestors used in order to explain the world before they developed the scientific method The ancient Egyptians explained the night by suggesting the goddess Nut swallowed the sun The Vikings believed a rainbow was the gods bridge to earth The Japanese used to explain earthquakes by conjuring a gigantic catfish that carried the world on its back earthquakes occurred each time it flipped its tail These are magical extraordinary tales But there is another kind of magic and it lies in the exhilaration of discovering the real answers to these questions It is the magic of reality science Packed with clever thought experiments dazzling illustrations and jaw dropping facts The Magic of Reality explains a stunningly wide range of natural phenomena What is stuff made of How old is the universe Why do the continents look like disconnected pieces of a puzzle What causes tsunamis Why are there so many kinds of plants and animals Who was the first man or woman This is a page turning graphic detective story that not only mines all the sciences for its clues but primes the reader to think like a scientist as well Richard Dawkins the world s most famous evolutionary biologist and one of science education s most passionate advocates has spent his career elucidating the wonders of science for adult readers But now in a dramatic departure he has teamed up with acclaimed artist Dave McKean and used his unrivaled explanatory powers to share the magic of science with readers of all ages This is a treasure trove for anyone who has ever wondered how the world works Dawkins and McKean have created an illustrated guide to the secrets of our world and the universe beyond that will entertain and inform for years to come
