Managing by Accountability Milton D. Dealy, Andrew R. Thomas, 2006-11-30 At its core accountability is the responsibility to act It is the commitment to do the right thing and stand by your decisions Perhaps most importantly it is a quality that must come from within dishearteningly even as legislators shareholders customers and community activists are demanding greater accountability from corporate leaders too many are waiting for some third party to take action Whatever the endeavor it is ultimately the individual who must hold himself to the highest standard first Those who manage by accountability viscerally know that external rules cannot substitute for character And they know that accountability is a quality that can be developed honed through practice and encouraged in others Using stories drawn from David Dealy s experiences on the front lines as well as examples from other successful leaders *Managing by Accountability* demonstrates how leaders who embark on a management philosophy of personal accountability imbue their organizations with the qualities of integrity and responsibility In their down to earth style the authors identify the five great accountability mistakes and offer a wealth of practical suggestions for overcoming them to achieve outstanding results throughout the organization In some cases it may be Congress e g Sarbanes Oxley legislation the media the company s legal or communications department Wall Street disgruntled customers or angry community activists This is not to say that formal accountability programs are useless they do play an important role Nevertheless it is ultimately the individual who must hold himself to the highest standard first without waiting to be told pushed or prodded Those who manage by accountability viscerally know that external rules cannot substitute for character And they also know that accountability can be developed honed through practice and encouraged in others *Managing by Accountability* demonstrates how leaders who embark on a management philosophy of personal accountability imbue their organizations with the qualities of integrity and responsibility Using stories drawn from David Dealy s experiences on the front lines as well as examples from other successful leaders the book provides concrete examples of accountability in action In their down to earth style Dealy

Managing for World Class Safety James Melville Stewart, 2012-11-28 Despite the extensive literature on safety few tools have been available to help managers quantitatively

assess the level of safety management and the quality of the safety practices in organizations In his consulting practice Dr Jim Stewart a former executive at DuPont developed such a method crafting a safety survey centering on a comprehensive questionnaire for employees at all levels that reveals the true level of corporate commitment to safety Managing for World Class Safety first describes the model of safety management that underpins the questionnaire and then demonstrates how this innovative procedure illuminates critical intangibles like management commitment the enforcement of rules worker involvement and injury investigation The central part of this book is the description of research at the University of Toronto that applies the questionnaire in comprehensive research at five of the world s safest companies and five with very poor safety The questionnaire polled 700 people in the ten companies measuring the level of more than twenty key elements such as The workers perception of the priority given to safety The belief that all injuries can be prevented The extent to which line management takes responsibility accountability for safety How well safety rules are followed and enforced The frequency and quality of safety meetings The level of recognition to reinforce safety excellence In every element the contrast between the responses from the very safe companies and those from the companies with poor safety was dramatic clearly depicting where the former succeed and the latter fail By developing quantitative benchmark data Stewart reasons that it will be easier to convince reluctant management to undertake the fundamental change necessary for a step change in their company performance Managing for World Class Safety promises a revolutionary new approach to workplace safety improvement for corporate leaders safety professionals and regulators Management Accountability and Corporate Governance K.
