## **Managing Industrial Decline Entrepreneurship In The British Coal Industry Between The Wars:**

*Managing Industrial Decline* Michael Dintenfass, 1992 *Managing Industrial Decline* examines the dramatic decline of the British coal industry through the lens of comparative business history challenging the prevailing belief that the industry's decline was due primarily to global economic factors and instead demonstrating that entrepreneurial failings of individual coal firms contributed significantly to the problem Through a comparative analysis of company histories Dintenfass shows how the full range of business operations at British coal firms including labor management policies technological choices and marketing practices affected their performance The histories of individual firms demonstrate that the managements could improve productivity increase sale prices and sustain profitability even as the coal trade succumbed to cyclical depression and secular decline According to Dintenfass comparisons between the individual firms and the regional coal industries to which they belonged show that neighboring firms were slow to introduce the modest innovations that the successful firms pioneered Since there were few barriers to the implementation of these strategies it appears that Britain's coal masters miscalculated their costs and benefits contributing to the problem by failing to adopt inexpensive and accessible second best solutions to production and commercial problems *Managing Industrial Decline* breaks new ground in the field of business history and restores entrepreneurship to its proper place in the analysis of industrial decline

**Regulated Enterprise** Christopher James Castaneda, 1993 Christopher Castaneda's study of the construction of the pipelines that transported southwestern gas to the Northeast traces the ways in which the federal regulatory process fostered competitive growth in the natural gas industry In 1938 the Natural Gas Act granted the Federal Power Commission jurisdiction over the interstate transmission and sale of natural gas The FPC used its new powers to guide shape and manage an intensely

competitive period in the industry As Castaneda shows aggressive and politically astute entrepreneurs based in the Southwest took advantage of economic opportunity and a regulatory environment conducive to industry growth They financed and built the nation's longest gas pipelines to connect the massive southwestern reserves with the major northern energy markets The coal industry which supplied the raw product for manufactured gas and the railroad industry which transported the coal adamantly but unsuccessfully opposed the action and attempted to halt the introduction of natural gas into their northeastern markets First during the war years emergency regulatory agencies directed the expansion of the industry into Appalachia Then in the ensuing peacetime market forces prompted entrepreneurs to compete vigorously for regulatory approval to build pipelines to sell natural gas in the Northeast While previous studies have examined the development of the natural gas industry after 1954 when the Supreme Court's Phillips decision established the FPC as a regulator of price control rather than as a manager of industrial growth Castaneda's is the first to examine this earlier entrepreneurial era Based on exhaustive research in corporate records and government documents *Regulated Enterprise* offers a case study of government business relations during a period of rapid industrial expansion and suggests a new way of looking at federal regulation and competitive growth **BOOK JACKET** Title Summary field provided by Blackwell North America Inc All Rights Reserved      **Internal Combustion** Edwin Black, 2008-04-30 An explosive eye opening expose of the corporate forces that have for more than a century sabotaged the creation of alternative energies and vehicles in order to keep us dependent on oil There is enough truth in this book to revolutionize our way of life Winner of four awards for editorial excellence American Society of Journalists and Authors Best Book Thomas Edison Award Green Globes and an AJPA Rockower Award      **Bibliographic Guide to Business and Economics** New York Public Library. country wide survey examines the nature of this transformation The material in the book is accessible because the book is clearly structured into 3 phases 1740 to the 1830s the 1830s to the 1890s and the 1890s to 1950 For each period the principal aspects of change in population industry the countryside and urban life are examined and regional examples given to support the analysis

**Capitalism at Work** Robert L. Bradley, 2014-05-14 [Read the Intro Chapter PDF](#) [View the Ayn Rand Appendix](#) [View an interview with author Robert L Bradley Jr at Reason.com](#) Capitalism took the blame for Enron although the company was anything but a free market enterprise and company architect was hardly a principled capitalist On the contrary Enron was a politically dependent company and in the end a grotesque outcome of America's mixed economy That is the central finding of Robert L Bradley's Capitalism at Work The blame for Enron rests squarely with political capitalism a system in which business firms routinely obtain government intervention to further their own interests at the expense of consumers taxpayers and competitors Although Ken Lay professed allegiance to free markets he was in fact a consummate politician Only by manipulating the levers of government was he able to transform Enron from a 3 billion natural gas company to a 100 billion chimera one that went in a matter of months from seventh place on Fortune's 500 list to bankruptcy But Capitalism at Work goes beyond unmasking Enron's sophisticated foray into political capitalism Employing the timeless insights of Adam Smith Samuel Smiles and Ayn Rand among others Bradley shows how fashionable anti capitalist doctrines set the stage for the ultimate business debacle Those errant theories like Enron itself elevated form over substance ignored legitimate criticism and bypassed midcourse correction Political capitali
