The eminent Harvard educationalist Howard Garner writes a preface to the Place Model within his Good Project Blog which provides a preface to this timely book Professional is a slippery term open to willful abuse misuse and misunderstanding as evidenced by the ways in which this chameleon term can be used as both a compliment and an insult In this book academics from a range of professional fields deconstruct professional and reimagine professionals in an age of rapid change where professionals are both increasingly in demand and frequently under threat Several deploy the lens of Clarke s Place Model to examine professions including teaching midwifery social work journalism and optometry Some papers are empirical and some are based around using the Place Model as a thought experiment All turn a critical eye on professionals and all find them to be like all humans neither devils nor divines Maya Angelou but at their best a combination of two indispensable characteristics trustworthiness and expertise **Police Ethics** Michael A. Caldero, 2014-10-13 This book provides an examination of noble cause how it emerges as a fundamental principle of police ethics and how it can provide the basis for corruption The noble cause a commitment to doing something about bad people is a central ends based police ethic that can be corrupted when officers violate the law on behalf of personally held moral values This book is about the power that police use to do their work and how it can corrupt police at the individual and organizational levels It provides students of policing with a realistic understanding of the kinds of problems they will confront in the practice of police work *Police Reform from the Bottom Up* Monique Marks, David Sklansky, 2014-04-10 What role can and should police unions and rank and file officers play in driving and shaping police reform Police unions and their members are often viewed as obstructionist and conservative not as change agents But reform efforts are much more likely to succeed when they are supported by the rank and file and line officers have knowledge skills and insights that can be invaluable in promoting reform Efforts to involve police unions and rank and file officers in police reform are less common than they should be but they are increasing and there is a good deal to learn about policing police reform and participatory management from the efforts made to date In this pioneering volume an international cross disciplinary collection of scholars and police unionists address a range of neglected questions both empirical and theoretical about the place of police officers themselves in the process of reform what it has been and what it could be They provide a fresh view of police reform as occurring from the bottom up rather than the top down This book will be highly useful for practitioners and scholars who have a serious interest in the possibilities and limits of police organizational change This book is based on special issues of Police Practice and Research and Policing and Society

Law Enforcement, Communication, and Community Howard Giles, 2002-07-25 Given widespread media attention to issues of crime and its prevention police heroism and new modes of police community involvements this international collection is timely It is unique in examining ways in which police and citizens communicate across a range of contexts and problem areas

While much attention is afforded the critical roles of communication by police agencies there has been little recourse to communication science and its theories Likewise the latter has not until recently concerned itself with analyzing police citizen interactions This volume examines the character of such encounters forging new theoretical frameworks having implications for practice in many instances Topics include media portrayals of law enforcement communication and new technologies within police culture domestic violence hate crimes stalking sexual abuse and hostage negotiations This book should be relevant not only to a range of social sciences besides Communication scholars and students but also to practitioners working in the field
