*Preoperative Assessment and Perioperative Management* Mark Radford,Clare Evans,Alastair Williamson,2011 Pre operative assessment of the surgical patient is a key part of the perioperative process However it is one that cannot be separated from the other aspects of perioperative management both clinical and administrative that ensures the safe and effective treatment of surgical patients There are a number of books on the market that examine perioperative management anaesthesia and surgical nursing that are only able to touch on the pre operative assessment process Pre Operative Assessment Perioperative Management sets out to be different by bridging the gap between these texts and the evolving and developing area of practice that pre operative assessment has become in modern healthcare In order to achieve this Pre Operative Assessment Perioperative Management has set out to deliver the core clinical aspects of practice linked to the education and service development needs of a perioperative service The challenge for such a book is to integrate this knowledge effectively using the best evidence base for use in every day practice The brief to the contributors was to help define pre operative assessment utilising their expertise to draw out some of the leading practices and thoughts of the day They have achieved this ensuring that the reader has access to some of the leading experts in international perioperative practice They have done this in an open and accessible style that will guide the reader though some complex and demanding subjects to enable them to deliver better front line care to surgical patients **Perioperative Nursing** Lois Hamlin,Marilyn Richardson-Tench,Menna Davies,2009 This new text discusses the roles and responsibilities of those working within the perioperative environment in Australia and New Zealand It highlights the changing face of perioperative nursing and gives an overview of key concepts including anaesthetic intraoperative and postanesthesia recovery care day surgery and endoscopy Professional development and medico legal aspects are also discussed This is an introductory text which will appeal to a broad market from trainee enrolled nurses to undergraduate nursing students doing a perioperative clinical placement to postgraduate students of perioperative nursing Registered nurses working within or preparing to work within this area as well as other operating room staff such as anaesthetic technicians will also find this text invaluable Brunner & Suddarth's Textbook of Canadian Medical-surgical Nursing Pauline Paul,Beverly Williams,2009 This is the Second Edition of the popular Canadian adaptation of Brunner and Suddarth s Textbook of Medical Surgical Nursing by Day Paul and Williams Woven throughout the content is new and updated material that reflects key practice differences in Canada ranging

*A Textbook of Perioperative Care* Kate Woodhead, Paul Wicker, 2005-05-18 Woodhead and

Wicker's new text will be the foremost reference source for all perioperative practitioners. The content mirrors the dynamics of modern perioperative practice by focusing on surgical interventions in all the environments in which it is currently practised, including A. This book does not attempt to reflect the needs of all specialties but instead concentrates on the principles of practice applicable to any setting and any specialty. It has a very practical focus; it aims to be the book that nurses and ODPs reach for in order to answer their practical questions but is not procedure-driven. Instead, it sets out the principles of perioperative practice from which practitioners will be able to develop their own practice techniques. Reflects principles of practice applicable to any perioperative environment. Strong practical focus. Edited by two of the biggest names in the international perioperative nursing sphere with contributions from other well-known and authoritative sources. Excellent opportunities to develop links with the National Association of Theatre Nurses and the European Operating Room Association. The team of contributors are experienced practitioners working directly with perioperative patients or in perioperative education. An original model for ethical practice is proposed; the Reid model is the first such ethical model to be proposed for the perioperative environment. Includes one of the only chapters in any perioperative book which specifically focuses on the care of the elderly. The research chapter encourages the use of evidence-based practice and the development of perioperative research. The unique chapter on care of the mentally ill will support practitioners who are not qualified in psychiatry to care for mentally ill patients. This is an area where there is a great information deficit. Key points listed for each chapter. Sections have been completely revised from previous edition; key subject areas now stand alone chapters rather than sections within much larger chapters, creating ease of access for user. Change of editorship. Recognises the diversity of perioperative environments much more explicitly than previous edition.
