**Abstract-** *In pre-modern societies, conflicts were often managed and resolved through a council of elders or eminent individuals within a traditional setting. Currently, conflict management seems to be complex due to the interdependence of actors that underlie varying interests leading to disputes which has to some level underrated the role played by the traditional leaders in disagreement mediation. This paper examines the role of traditional leaders in managing political conflict for peace building at national level in Zambia. Using qualitative approaches and a case study research design, data was collected through semi structured interviews with 30 key informants who were purposively sampled. The study was also shaped by secondary sources of data and desk reviews. The data was analysed following a thematic approach. The results of the study confirm that traditional leaders have influence in political conflict management and peace building processes. This paper has revealed that the role of traditional leaders or chiefs played a significant role in the nationalist movement. Their positive contribution manifested itself from economic growth to political and social development before and after Zambia's independence. It is clear in this study that the effect of traditional leadership in countries like Zambia is still active with considerable amount of leverage on the political direction of a country and chiefs in chiefdoms, who have the power to mediate various forms of conflicts including political disputes.*

## 1. INTRODUCTION

Conflict management refers to the management of conflicts by which parties of a conflict come together to solve their conflict or differences [1]. Traditional

leaders have long been involved in mediation by creating a balance in the process of mediation and tribal disputes and in some cases led in restoring peace and reconciliation ventures. Traditional leaders have been given prominence in mediation of disputes especially in Africa and Asia and are often perceived as leaders with wisdom to navigate conflict negotiation processes, they are also highly valued and regarded in our African institutions as important part of the African culture however, this is just in theory since their input in solving conflicts is not put in practice at national level [2, 3].

From the crisis in Angola, to the post genocide conciliation process in Rwanda and Liberia, traditional elders have played an important role, however their role in conflict management has arguably not been well documented within the realm of national peace initiatives. The success of traditional leaders in solving inter-clan or tribal conflicts stems from the fact that they form the core of society and socialization process in many African countries. In the olden days, when traditional leaders were engaged in conflict resolution by the colonial masters, their input was arguably not taken into consideration [4]. As a result, peace outcomes negotiated were not accepted or implemented successfully by people who were intrinsically webbed in clan leadership as they did with internal state peace agreements. Therefore, it can be argued that social strands of many African nations are weaved within traditional tenets, making it necessary that any attempted effort for conflict resolution and reconciliation considers traditional leaders in conflict management, mediation and peace building [5].

In modern state settings, the roles that traditional authorities can play in the process of good governance can broadly be separated into three categories: first, their advisory role to government, as

**Managing Conflicts in a Globalizing ASEAN** Mikio Oishi, 2019-11-11 This book investigates the patterns of conflict management in contemporary Southeast Asia The region has long been characterized by the twin process of state formation and nation building which has been responsible for most of the region's intrastate and interstate conflicts While this process is still ongoing regional conflicts and their management are increasingly affected by globalisation which not only serves as a new source of or exacerbating factor to conflict but also makes new instruments available for conflict management Employing the concepts of incompatibility management and mediation regime the book analyses the management of seven conflicts in the region the Rohingya crisis and the Kachin conflict in Myanmar the Khmer Krom conflict in Vietnam the West Papua conflict in Indonesia the political conflict in Thailand the Mekong River conflicts involving five Southeast Asian countries and China and the transboundary haze problem emanating from Indonesia The efforts to manage each of them are imagined as constituting a mediation regime and its effectiveness is assessed in terms of good governance Among the findings of the book is that the measures of manoeuvring around incompatibilities are employed predominantly in managing regional conflicts In intrastate conflicts which mostly involve ethnic minorities the authorities first aim to eliminate or impose its own position on ethnic parties When this strategy proves unsuccessful they have no choice but manoeuvre around incompatibilities which may eventually open up a space for mutual learning In interstate conflicts the manoeuvring around strategy works in a more straightforward manner contributing to regional stability However the stability is achieved at the cost of local communities and the natural environment which absorb the incompatibilities in conflict *Political Risk*

groundwork for efficient and effective political risk management Evaluating the effectiveness of responses The book begins with an overview on why political risk management is an important yet overlooked topic and the corresponding consequences if it is ignored or overlooked by enterprises and their global supply chains Next it provides systemic and systematic perspectives on political risk management and explains why the topic is more important than ever Most important it provides a framework that enterprises regardless of nationality can use to develop and deploy to manage political risks The book concludes by discussing the full spectrum of developing deploying testing and maintaining processes to conduct political risk management

**Conflict and Conflict Management** Joseph S. Himes, 2008-06-01 The scope and content of Conflict and Conflict Management derive from some of the most frequently asked questions about the subject What is social conflict What are its prominent characteristics and most common forms Is conflict inevitable How do social structure and unequal distribution of power affect the prevalence and nature of conflict Are there positive consequences of conflict What actions can be taken to prevent conflict Can conflict be predicted and forestalled Joseph S Himes effectively demonstrates that contemporary social science can provide answers to most of these questions His responses to the questions are drawn from social science literature theory and research and are organized around two central issues the effort to understand social conflict and the task of managing it Conflict and Conflict Management is divided into two sections each covering one of these two central issues The importance of Himes's overview is threefold In the first place it unites recent theory and research in a systematic synthesis Secondly it grounds the strategies of conflict management in a theory of conflict causation thus providing a rationale for the strategies discussed And finally his work illuminates the study of social conflict by differentiating legitimate from nonlegitimate expressions and thus clarifies both the task of analysis and the business of management

**International Perspectives on Social Work and Political Conflict** Joe Duffy, Jim Campbell, Carol Tosone, 2019-10-21 International Perspectives on Social Work and Political Conflict provides an important basis for readers to recognise and understand the unique and specialist role that social workers have played and continue to play in international contexts of political conflict Social workers make an important contribution in these difficult and sometimes dangerous situations across all continents This book highlights the importance of social work in these very challenging contexts The first part of this book includes four chapters that summarise the existing knowledge base The second part focuses on a case study of Northern Ireland where for the first time a detailed examination of the social work role was completed which involved researching the views of social work practitioners managers and educators Part three then draws together international experts in the field who have written chapters on those regions where social workers have been dealing with long standing periods of political conflict At a time when violent conflagrations are currently a feature of many countries and regions across the continents of the world this book offers a critical view of the social work role in these contexts and should thus be considered essential reading for all social work academics students and professionals working in conflict affected societies

**Regional Conflict Management** Paul F. Diehl, Joseph Lepgold, 2003-02-11 Since the 1990s the international security environment has shifted radically. Leading states no longer play as great a role in regional conflicts and thus a new opportunity for regional conflict management has opened. This collection of original essays is one of the first to examine the implications and efficacy of regional conflict management in the new world order. The editors' general overview provides a framework for analyzing regional conflict management efforts and the kinds of threats faced by actors in different regions of the world. Case studies from every major world region then place these factors into specific regional contexts and address a variety of challenges. Drawing together a diverse group of scholars from around the world, *Regional Conflict Management* provides key lessons for understanding conflict management over the globe.

A diverse and international collective of eminent scholars and thought leaders leverage their research expertise to present concise reviews of the state of the art of research in ISM, exploring the manifold aspects of firms' global strategies.

**National Security, Democracy, and Good Governance in Postmilitary-Rule Nigeria, Volume Two** Dr. Dan Mou, 2017-01-12 This book shows that the security, economic, political, and social problems challenging national security, democracy, and good governance currently in Nigeria would get better or worse depending on what happens to the 71 percent of Nigerians' population still living below the poverty line. This is in spite of the billions of petrodollars that Nigeria garnered as revenue over the past few decades. It reveals that one does not need to be a political prophet to predict that if these challenges are not successfully addressed through good governance and inclusive growth, this country will witness worse civil disobedience, violence, revolts, militancy, breakdown of law and order, more kidnappings, and more of the citizens trying to check out of the country to other parts of the world in the future. It concludes, however, that under such intense pressures, the Government of Nigeria, even if it is simply for its self-preservation, will be forced by the objective conditions to move against the interests of the dominant groups and classes in Nigeria. These are the ones who have for long captured and hijacked state power and the resources of the country for their exclusive use. There is this perception that Nigerians don't write and read. This perception is deep-seated even among intellectuals who see our authors as shallow researchers. But Dr. Dan Mou has debunked that myth and shown that Nigerians can write well-researched and detailed books. It is quite prophetic in its assessment of the Nigerian State. Agbo Agbo, deputy editor, *The Nation*. Dr. Dan Mou has proven himself a world-class scholar and an intellectual colossus. His reputation as an internationally renowned public policy expert has continued to soar. I congratulate him for these remarkable achievements. Professor Justice Abdul Fatai Kuti, first justice of Abuja High Court and former dean, faculty of law, University of Ado Ekiti, Ekiti State of Nigeria. Dr. Mou is certainly one of the best scholars we have on the African continent. As an educationist myself, before I became a traditional ruler, I agree totally

with his analysis and conclusions I share the optimism Dr Mou has expressed that once the recommendations therein are adopted and meticulously implemented with proper monitoring and evaluation of such resultant policies and programmes Nigeria and indeed Africa would be able to solve most of these challenges HRH Alh Dr Sheban Audu Nizazo III Etsu Kwali Etsu Kwali Palace Abuja Nigeria      Elections and Conflict Management in Africa Timothy D. Sisk, Andrew Reynolds, 1998 Elections have emerged as one of the most important and most contentious features of political life on the African continent In the first half of this decade there were more than 20 national elections serving largely as capstones of peace processes or transitions to democracies The outcomes of these and more recent elections have been remarkably varied and the relationship between elections and conflict management is widely debated throughout Africa and among international observers Elections can either help reduce tensions by reconstituting legitimate government or they can exacerbate them by further polarizing highly conflictual societies This timely volume examines the relationship between elections especially electoral systems and conflict management in Africa while also serving as an important reference for other regions The book brings together for the first time the latest thinking on the many different roles elections can play in democratization and conflict management      **Political Conflict and Development in East Asia and Latin America** Richard Boyd, Galjart Benno, Tak-Wing Ngo, 2007-01-24 Long run processes of socio economic change generate prodigious problems of social conflict and social control and governments responsible for these processes must therefore manage the resultant conflict Consequently the success or failure of a government's management of such conflicts is a crucial factor in development outcomes This volume investigates the political struggle for development specifically in two vital regions East Asia and Latin America This analysis calls into question the dominant emphasis on institutional and cultural bases for stable growth A careful historical account of the two regions is presented which permits the rigorous testing of conventional wisdoms regarding development Of importance to a broad range of academics in the spheres of development studies politics political economy and sociology this book will also make an interesting read for those with a general interest in these areas

**Democracy and Violence** John Schwarzmantel, Hendrik Kraetzschmar, 2013-09-13 Illustrated most dramatically by the events of 9 11 and the subsequent war on terror violence represents a challenge to democratic politics and to the establishment of liberal democratic regimes Liberal democracies have themselves not hesitated to use violence and restrict civil liberties as a response to such challenges These issues are at the centre of global politics and figure prominently in political debates today concerning multiculturalism political exclusion and the politics of gender This book takes up these topics with reference to a wide range of case studies covering Latin America the Middle East Africa Asia and Europe It provides a theoretical framework clarifying the relationship between democracy and violence and presents original research surveying current hot spots of violent conflict and the ways in which violence affects the prospects for democratic politics and for gender equality Based on field work carried out by specialists in the areas covered this volume will be of high interest

to students of democratic politics and to all those concerned with ways in which the recourse to violence could be reduced in a global context This book has significant implications for policy makers involved in attempts to develop safer and more peaceful ways of handling political and social conflict This book was published as a special issue of Democratizations

Deterrence Thom Brooks, 2019-11-11 Deterrence is a theory which claims that punishment is justified through preventing future crimes and is one of the oldest and most powerful theories about punishment The argument that punishment ought to secure crime reduction occupies a central place in criminal justice policy and is the site for much debate Should the state deter offenders through the threat of punishment What available evidence is there about the effectiveness of deterrence Is deterrence even possible This volume brings together the leading work on deterrence from the dominant international figures in the field Deterrence is examined from various critical perspectives including its diversity relation with desert the relation of deterrence with incapacitation and prevention the role deterrence has played in debates over the death penalty and deterrence and corporate crime

**Making of an African Giant** Dan Mou, 2015-10-16 The performance of Nigeria has recently been vehemently criticized as not commensurate with her human and material potentialities The hope that Nigeria is by destiny the African Giant appears to be fading Some analysts seeing this have blamed it on the character defects of the leadership in Nigeria They argue that because the leaders are predatory and corrupt they have preoccupied themselves with their interests which are primitive accumulation and luxurious lifestyles Meanwhile the rest of the citizens are suffering This book argues that such character defects may indeed exist in some of Nigerian leaders However these are not the main reasons for their dismal performance regarding the welfare of the citizens The main problem is that Nigerian leaders seem to have largely lost control over the state and its policies which appear to have been captured by the dominant classes and groups local and international Nigerias main problem is therefore a structural one Nonetheless the book concludes as the security economic political and social crises intensify Nigerian leaders even if it is simply for self preservation will be forced by the objective conditions to move against the interests of these dominant classes and groups It is only then that Nigeria can realistically be restored to the possibility of becoming an African Giant

*Managing Ethnic Conflict in Africa* Donald S.
