Managing Take Off In Fast Growth Companies:

High Performance Leadership Philip Robert Harris,1994 *Handbook of Entrepreneurial Cognition* J. Robert Mitchell,Ronald K. Mitchell,Brandon Randolph-Seng,2014-12-31 Entrepreneurial cognition research is at a crossroads where static views give way to dynamic approaches This Handbook draws on a variety of perspectives from experts in the field of entrepreneurial cognition to highlight the key elements in a soci

Computing and Change on Campus Sara Kiesler, Lee Sproull,1987-09-25 In this book the authors examine the impact of computerization on faculty staff administrators and students and find that the new technology has social consequences changes in patterns of attention social contact norms and social structure

Leadership Robert P. Vecchio,2007-06-01 Today there are a growing number of business schools law schools and continuing education programs in executive development and management training that offer leadership classes Despite the growing curricular recognition of this area there is a shortage of strong college level texts Leadership second edition a completely up to date anthology of key writings by well known contributors meets this need for a textbook that encompasses the major theories in the field of leadership Leadership is divided into six sections Part I provides an overview of the subject with readings that examine what leaders actually do as well as the many myths surrounding the notion of leadership Part II focuses on the fundamentals of leadership by taking a close look at the specific tactics people use to get their own way These readings analyze the political games people play and the two way nature of leader subordinate influence Part III considers problems that can arise from leadership gone wrong when power and influence are abused The major formal models of leadership that have been offered over the years are reviewed in Part IV The next section looks at contemporary views of leadership emphasizing reliance on maturity of subordinates for success including leadership in the context of self directed work teams entrepreneurial leadership the notion of the leader as servant and examples of leaders who are recognized for having empowered others or for providing moral leadership The final section examines the roles of societal and organizational cultures as they pertain to leadership Robert P Vecchio has updated the second edition with six new articles Aimed at upper level undergraduate and graduate level courses Leadership continues to provide classic essays by the major figures in the field of leadership along with topical essays on current and emerging issues

Evolutionary Social Psychology Jeffery A. Simpson,Douglas T. Kenrick,2014-02-25 What a pity it would have been if biologists had refused to accept Darwin s theory of natural selection which has been essential in helping biologists understand a wide range of phenomena in many animal species These days to study any animal species while refusing to consider the evolved adaptive significance of their behavior would be considered pure folly unless of course the species is homo sapiens Graduate students training to study this particular primate species may never take a single course in evolutionary theory although they may take two undergraduate and up to four graduate courses in statistics These methodologically sophisticated students then embark on a career studying human aggression cooperation mating behavior family relationships or altruism with little or no

understanding of the general evolutionary forces and principles that shaped the behaviors they are investigating This book hopes to redress that wrong It is one of the first to apply evolutionary theories to mainstream problems in personality and social psychology that are relevant to a wide range of important social phenomena many of which have been shaped and molded by natural selection during the course of human evolution These phenomena include selective biases that people have concerning how and why a variety of activities occur For example information exchanged during social encounters is initially perceived and interpreted people are romantically attracted to some potential mates but not others people often guard protect and work hard at maintaining their closest relationships people form shifting and highly complicated coalitions with kin and close friends and people terminate close long standing relationships Evolutionary Social Psychology begins to disentangle the complex interwoven patterns of interaction that define our social lives and relationships

Entrepreneurship Norris F. Krueger, 2002 This new collection provides a much needed retrospective view of the key academic work published in this area The papers here highlight the importance of studying entrepreneurship from a wide range of perspectives including research that derives from economics history sociology psychology and from different business disciplinary bases such as marketing finance and strategy The overall focus in this set is on entrepreneurial activity rather than specifically small or family owned business and favours research articles over those that deal purely with practice

Capital, Emerging High-Growth Firms and Public Policy Terry F. Buss, 2001-03-30 Policy makers Republican and Democrat liberal and conservative call for federal intervention to fund emerging high growth industries believing they are starved for capital Congressional hearings newspapers industry newsletters and government reports all assert that capital gaps exist for these firms But the widely held belief that emerging high growth firms like those in high technology so vital to the growth of the U S economy face severe capital gaps preventing them from starting up or growing to their full potential is false This book systematically brings together for the first time disparate sources of information from a wide variety of disciplines and synthesizes them into a compelling case against federal intervention Scientific studies conventional wisdom among entrepreneurs and investors and economic reasoning all fail to support the existence of widespread capital gaps for start up high growth firms Nor does this evidence show capital in short supply in some regions in industrial sectors including high technology or for women and minorities Nor do existing federal programs providing capital to emerging high growth businesses reveal capital gaps Rather they either unnecessarily duplicate private investment or represent poor investment decisions This study shows that calls for increased federal intervention using public monies to plug capital gaps are unjustified
