Leveraging Co-created Knowledge in Multi-sector University-Industry Collaboration Ehab Abu Sa'a, 2025-04-16

In an era of accelerating technological complexity and societal transformation multi sector university industry collaborations UICs have become vital arenas for co creating and exchanging knowledge across institutional and industrial boundaries Yet industrial organizations often struggle to harness the full potential of such collaborations particularly when it comes to effectively sharing recognizing and leveraging knowledge among diverse actors from different industries Much of the existing research remains centered on the academic perspective of UIC typically portraying universities as the primary source of knowledge Such a framing tends to overlook the industrial perspective especially the potential of industry to industry knowledge sharing and the perspective of firms with limited UIC experience Furthermore previous research has largely focused on dyadic university industry ties and immediate project level outcomes with less attention to the structural organizational and social dynamics that support knowledge exchange across industries and how this knowledge is later integrated within firms and diffused to the broader knowledge ecosystem This thesis addresses these gaps by exploring how collaboration level structures and firm level actions influence the sharing and leveraging of knowledge within and beyond multi sector UICs It is based on a compilation of five empirical research articles grounded in case studies of multi sector UIC initiatives in Sweden and Denmark involving diverse industries academic actors and intermediaries Data was collected mainly through interviews and observations The analysis covers collaboration structures and practices boundary spanning roles industrial engagement strategies and actions related to internal knowledge dissemination The thesis makes three key contributions First it identifies collaboration level structures both formal and informal that support cross industry knowledge sharing and ecosystem shaping Second it highlights industrial level actions that enable deep internal knowledge integration with attention to experience engagement and organizational readiness Third it offers a framework of pathways and antecedents to leveraging knowledge in multi sector UICs emphasizing the interplay of structures social capital and industrial engagement These insights provide practical implications for industrial organizations UIC managers and policymakers aiming to foster impactful inclusive and sustainable collaborations
