Managing Environmental Disputes Network Management As An Alternative:

Managing Environmental Disputes Pieter Glasbergen,2011-09-27 The concept of sustainable development is a source of inspiration for many who see it as a call to cooperative action In practice however policies intended to further this goal often generate conflicts of interest The ensuing disputes occur among governmental organizations but disputes also arise between public authorities private interest groups and the environmental movement In the opinion of the authors the fact that environmental policy can provoke such conflict may be attributed largely to decision making procedures in our society Accordingly the authors are convinced that a new approach to managing environmental disputes is needed in order to deal effectively with environmental problems Indeed this book presents a viable alternative which is called network management

Governing Environmental Conflicts in China Yanwei Li,2018-02-21 Environmental conflicts are the source of many large scale popular protests in China with some protests substantially endangering social order Such protests have often prompted severe counter measures by both national and local government but have often then gone on to result in compromises whereby the demands of protesters have been largely met This book considers the nature of environmental conflicts in China and the way in which national and local governments have handled the situations It includes detailed case studies of particular conflicts relates the governance of environmental conflicts in China to wider discussions on the nature of governance and examines under what conditions government in China makes compromises The book concludes by assessing the lessons for the future

Environmental Policy in an International Context Pieter Glasbergen,Andrew Blowers,1995-10-19 The three volumes of Environmental Policy in an International Context have been developed by the Dutch and UK Open Universities as part of the International Environmental Series They accompany a workbook and six videos The first volume takes a critical and analytical look at contemporary environmental issues built around the key questions what are international and environmental problems and why have they become important politically These questions are examined from a variety of viewpoints science sociology politics law and economics A multi disciplinary approach is emphasised and it shows how both technical and scientific solutions need to be sought alongside Regional Opportunities for Sustainable Development H.J. de Graaf,C.J. Musters,W.J. Ter Keurs,2013-04-18 By their adoption of Agenda

21 most of the world's governments have acknowledged the need for sustainable development. This implies that new policies are needed focusing on economic, social, cultural, and ecological goals. At the same time, we also need to solve existing environmental and social problems and prevent the occurrence of new ones. This volume presents tests and illustrates a theoretically well-founded procedure for discovering regional opportunities for sustainable development based on a systems approach to decision making. The procedure takes as its starting point the needs of the people involved, relating these to the measurement of available resources in order to find opportunities for multiple resource use and sustainable development. The needs of future generations and broader communities are taken into account throughout. The book studies regional planning and the implementation of plans, offering guidance and support to parties involved in debates on sustainable development and improving the quality of their decision making.

Partnering for the Environment Eric C. Poncelet, 2004-02-10

Environmental policy domains are increasingly adopting strategies of cooperation over those of conflict. Decision making processes founded upon collaboration and public participation are receiving more attention and favor, and in turn engendering multistakeholder environmental partnerships. In his thoughtful analysis, Eric C. Poncelet seeks to illuminate the mechanics of these partnerships, especially at the level of social interaction. Drawing on ethnographic research performed with four case study partnerships in the European Union and the United States, Poncelet focuses on the diverging ways that stakeholders think, talk, and conventionally act with regard to the environmental issues at stake. Also explored are the roles of environmental partnerships as sites of personal transformation where participants and their perspectives, conceptualizations, and expectations can and do change. *Partnering for the Environment* concludes by examining the broader implications of multistakeholder partnerships for the future of environmental decision making and suggests ways by which these partnerships may be more effectively used and managed.

Managing Complex Networks Walter J. M. Kickert, Erik-Hans Klijn, Joop F. M. Koppenjan, 1997-06-19

Although the concept of policy networks is now well established in the field, most research has to content itself with description and analysis of their contribution to policy failure. This book goes further. It accepts policy networks as a fundamental characteristic of modern societies and presents an overview of the strategies for the management of these networks, as well as illustrating the various strategies for intervention.

Conflict and Cooperation on the Scheldt River Basin S.V. Meijerink, 2012-12-06

More than 200 major river basins are shared by two or more countries, and together these basins account for about 60% of the earth's land area, constituting a significant portion of the world's fresh water resources. They are thus both a significant asset to the nations sharing them, as well as a potential source of conflict. This book presents a generic framework for the analysis of decision making on international river issues. It emphasises the strategic character of the interactions between the basin states and addresses learning and institutionalization processes, taking account of the influence of the context on the decision making process. The case of the river Scheldt covers negotiations on the Belgian-Dutch water conventions, covering a number of international issues relating

to the river basins of the Scheldt and the Meuse such as construction projects aimed at improving the maritime access to the port of Antwerp the maintenance of the navigation channel in the Western Scheldt pollution of the waters in the two rivers and the distribution of water from the Meuse The final part of the book contains a typology of strategies for the solution of upstream downstream problems in international river basins Audience All those interested in international water and environmental management international negotiations and politics and public policy *Managing Uncertainties in Networks* Johannes Franciscus Maria Koppenjan,Erik-Hans Klijn,2004 Despite sophisticated technology and knowledge the strategic networks and games required to solve uncertainties becomes more complex and more important than ever before

Environmental Management in Practice: Vol 1 Paul Compton,Dimitri Devuyst,Luc Hens,Bhaskar Nath,2013-01-11 Focuses on the instruments and tools currently available to the environmental manager A theoretical background to the instruments is given together with an overview of those instruments that are in common use today with particular attention to the physical economic legislative and communication instruments **Handbook of Decision Making** Goktug Morcol,2006-11-01 Handbook of Decision Making includes the wisdom of the long theological and philosophical traditions of human society as well as a systematic exploration of the implications of contemporary evolutionary theories Common patterns in decision making styles are identified as well as the common variations that different contexts may generate The text covers the multiplicity of mainstream decision making styles such as cost benefit analysis and linear programming It also explains alternative and emerging methods such as geographic information systems Q methodology and narrative policy analysis Practical applications are discussed using decision making practices in budgeting public administration and governance drug trafficking and information systems Environmental Land Use Planning Seth Appiah-Opoku,2012-11-07 Environmental Land Use Planning brings together leading scholars in the field of environmental problem solving to examine environmental problems and effects on land uses analytical methods and tools in the field and the role of governments community grants and tradable permits in environmental planning The chapters are based on empirical research from countries around the globe including Canada USA China Nigeria Germany Serbia Venezuela and Brazil The book discusses such issues as predicting changes in land use pattern ecological footprint analysis socioeconomic and behavioral modeling and flood control approaches It is insightful and serves as an important resource and reference material on environmental management Environmental Health Risk C. A. Brebbia,D. Fayzieva,2001-09-07 Good health depends on many factors including high quality air water soil and food As environmental problems increase related health issues are also becoming a source of major worldwide concern It is therefore essential to establish effective measures to eliminate or considerably reduce hazardous factors from the environment measures highly dependent on the application of suitable experimental modelling and interpretive techniques to achieve a balanced assessment of the risks involved Covering the latest developments in this field this book features edited versions of papers presented at the First International Conference on the

Impact of Environmental Factors on Health Environmental Health Risk 2001 The volume provides an easily accessible source of information on the interrelation between environmental risk and health which is often complex and can involve a variety of social occupational and lifestyle factors It also emphasizes the need to adopt an interdisciplinary approach in order to effectively recognize and avoid such problems The contributions are divided under the following headings Air Pollution Water Supply and Quality Waste Water and Surface Water Problems Radiation and Noise Microbial Risk Population Health and Solid Waste

Governance and Public Administration in China Toby S. James, Wei Liu, Caixia Man, 2022-12-26 China has traditionally been held up around the world as the archetype of centralised governance and a top down system of public administration But to what extent does this remain true of modern China This book provides an updated perspective on modern China through a series of cutting edge original studies focusing on public administration in China The book opens with an overview of the key political institutions and the evolution of public administration research in China followed by two distinct sections Part I contains studies focusing on power governance and administration Part II focuses on what works in solving wicked problems in Chinese society The volume shows that China has seen some localisation and decentralisation alongside experiments with collaboration and networked based policy making However the system of governance and public administration remains innately top down and centralised with the centre holding strong policy levers and control over society As the pandemic revealed this statist approach provided both governing opportunities and disadvantages The chapters in this book were originally published as a special issue of Policy Studies

Environmental Policy in an International Context Peter Sloep, Andrew Blowers, 1996-03-29 Volume two considers major environmental issues using individual case studies from around the world as illustrations These case studies explore the causes of international environmental issues and investigate the conflicts that hamper these solutions The case studies address such problems as intensive farming overpopulation deforestation climate change and waste disposal Each case study also looks at policy and management of these international environmental issues The case studies span the globe encompassing the Western world as well as the former Eastern Bloc and developing countries in Africa and South East Asia A critical and analytical look at contemporary environmental issues Aimed to provide a body of knowledge to social and natural scientists A multi disciplinary approach

Land and Limits Richard Cowell, Susan Owens, 2005-07-05 In a new and critical analysis this book explores the impact of an influential idea sustainable development on the institutions and practices governing use of land It examines the paradox that in spite of increasing attention to sustainability land use conflict is as ubiquitous and intense as ever

Governance Networks in the Public Sector Erik Hans Klijn, Joop Koppenjan, Wouter Spekkink, Rianne Warsen, 2015-08-28 Governance Networks in the Public Sector presents a comprehensive study of governance networks and the management of complexities in network settings Public private and non profit organizations are increasingly faced with complex wicked problems when making decisions developing policies or delivering services in the public sector These activities take place in

networks of interdependent actors guided by diverging and sometimes conflicting perceptions and strategies As a result these networks are dominated by cognitive strategic and institutional complexities Dealing with these complexities requires sophisticated forms of coordination network governance This book presents the most recent theoretical and empirical insights into governance networks It provides a conceptual framework and analytical tools to study the complexities involved in handling wicked problems in governance networks in the public sector The book also discusses strategies and management recommendations for governments business and third sector organisations operating in and governing networks Governance Networks in the Public Sector is an essential text for advanced students of public management public administration public policy and political science and for public managers and policymakers **Co-operative**

Environmental Governance P. Glasbergen, 2012-12-06 New philosophies of environmental management are being put to the test in many countries New ideas are needed to replace or at least flank the old command and control approach which has lost its credibility One of the most interesting new avenues is co operative environmental management whereby public and private parties work together to tackle a problem It is interesting because it seems to be well suited to handling complex environmental problems This kind of management makes use of the policy instrument known as the Environmental Agreement That tool is geared to the development of sustainable procedures for working out solutions The Environmental Agreement provides scope to deal with some essential characteristics of current environmental problems Indeed one of the most vexing aspects of environmental problems is uncertainty both in the ecological sphere and with respect to the economic effects of intervention In short this instrument takes the unknown into account Tourism and the Environment Helen Briassoulis, Jan van der Straaten, 2013-11-11 There is a complex relationship between the environment and the development of tourism which this book discusses in a thorough and informative manner Specialists from several disciplines pay attention to the challenges of sustainable tourism devoting their full attention to cultural regional and policy issues This is a revised edition that has been expanded to 22 contributions with inclusion of the cultural element All chapters have been updated to include new data and information added to the existing body of literature in the last 7 years It includes new developments and new insights into the relationship between tourism and the environment An invaluable sequel to the first edition

Land and Limits Susan Owens, Richard Cowell, 2011-03-17 This book explores the impact of an influential idea sustainable development on the institutions and practices governing use of land The new edition adds a Foreword by Professor John Forester as well as a substantial chapter by the authors in which they reflect on the arguments propounded in the book in the light of subsequent events
