Hasan, 2002-09-23 This book constitutes the refereed proceedings of the 5th IFIP IEEE International Conference on the Management of Multimedia Networks and Services MMNS 2002 held in

Santa Barbara CA USA in October 2002 The 27 revised full papers presented were carefully reviewed and selected from a total of 76 submissions The papers are organized in topical sections on service management management of wireless multimedia bandwidth sharing protocols distributed video architectures management systems differentiated network services user level traffic adaptation and multicast congestion control **Managing Multimedia Libraries** Warren B. Hicks, Alma M. Tillin, 1977 Philosophy and goals Multimedia library organization Multimedia library management The personnel management plan Budget management Managing multimedia resources selection Managing multimedia resources acquisitions cataloging and physical processing Managing public services circulation and reference Overview and discussion of some future concerns Managing QoS in Multimedia Networks and Services José Neuman de Souza, Raouf Boutaba, 2000-09-30 Welcome to the third International Conference on Management of Multimedia Networks and Services MMNS 2000 in Fortaleza Brazil The first MMNS was held in Montreal Canada in July 1997 and the second MMNS was held in Versailles France in November 1998 The MMNS conference takes place every year and a half and is aimed to be a truly international event by bringing together researchers and practitioners from all around the world and by organising the conference each time in a different continent country Over the past several years there has been a considerable amount of research within the fields of multimedia networking and network management Much of that work has taken place within the context of managing Quality of Service in broadband integrated services digital networks such as the ATM and more recently in IP based networks to respond to the requirements of emerging multimedia applications ATM networks were designed to support multimedia traffic with diverse characteristics and can be used as the transfer mode for both wired and wireless networks A new set of Internet protocols is being developed to provide better quality of service which is a prerequisite for supporting multimedia applications Multimedia applications have a different set of requirements which impacts the design of the underlying communication network as well as its management Several QoS management mechanisms intervening at different layers of the communication network are required including QoS routing QoS based transport QoS negotiation QoS adaptation FCAPS management and mobility management **Managing Multimedia** England, 2002-09-01 **A Project Management Methodology for Multimedia Projects** Stefan Hartweg, 2002-05-17

Inhaltsangabe Abstract This paper tries to define a concept for managing multimedia projects efficiently and takes the suitability of existing methods into account Developing a valid solution makes it necessary to look at project management as a generic discipline first and then apply the results to the multimedia discipline Only then can we be sure that no important aspects of project management have been forgotten nor that existing and working strategies which could be applied to multimedia projects have been ignored This paper therefore defines project management and generally describes its areas of responsibility The question of whether project management is necessary and beneficial needs to be addressed as well After project management and the necessity to actively apply it in some form has been understood in general a specific focus on

the existing information for multimedia project management will be undertaken It will become apparent that different viewpoints exist as to whether multimedia project management should apply project management methods of related industry areas such as software development This will justify the need to compare multimedia projects with software development projects After having gained an insight into project management as well as the characteristics of multimedia projects it is possible to determine the demands that a project management method needs to be able to meet to successfully manage multimedia projects It would be beyond the scope of this thesis to analyse every existing method Instead one method will be analysed as an example The useful aspects of the analysed method will be identified along with its shortfalls in relation to multimedia development Finally recommendations on how the shortfalls could be corrected will be made so that a project manager will be able to use the examined method specifically suited to multimedia projects
