Managing Quality The Strategic And Competitive Edge:

Managing Quality David A. Garvin, 1988 Case study research conducted in 1981 in nine US companies and seven Japanese companies *Management* Keuning Doede, 2013-12-19 Management A European Perspective adopts a step by step approach based on the key managerial skills planning organization implementation supervision and control to provide a practical introduction to the field Looking at some leading international companies Keuning draws on various managerial and organizational concepts including industrial democracy corporate governance ethics culture and gender ICT related changes in industries e business risk management and network organization Among the special features designed to enhance the learning process are Detailed case studies demonstrating the practical implications of the concepts discussed References in the form of examples and brief studies with a European or international focus Numerous discussion questions relating to each chapter s theory Material from European newspapers and magazines to reinforce the book s practical orientation This book is an ideal introduction for students starting out their business program **Innovative Quality Improvements in Operations** Tomas Backström, Anders Fundin, Peter E. Johansson, 2017-07-13 This book examines current and emerging challenges in manufacturing related to the ideal of developing production processes with variability and agility on one level of the system combined with structures ensuring stability and robustness on another level close to what by other scholars has been discussed in terms of continuous innovation However this ideal has proven to be difficult to achieve in practice and there is a need for enhanced and more sophisticated theoretical models dealing with the complexity surrounding organizational conditions to foster incremental as well as radical change in production systems and at the same time to ensure stability over time As a theoretical frame of reference a perspective on change where conflicting demands and conflicting activities e g exploration and exploitation are seen as intertwined and interdependent is used throughout the book The ideal from this perspective is to make use of such conflicting forces and to develop the change dynamics by keeping them in the same social system not to structurally separate them in different departments or different initiatives The main purpose of the book is to address an increased need for quality improvement through innovation and disruptive change in production Traditional theories and managerial models of production systems are developed with a focus on stability and improvement There is a need for enhanced models to reach an ability to develop new future production systems The goal of the book is to provide nuances and new perspectives giving more realistic models of the production system to be able to increase the change potentiality of the organization and thus the long term competitiveness Learning and organizational perspectives are in focus as enablers to increase the understanding of a production system as such Long term competitiveness through adaptability and the potential for radical improvement is of importance throughout the book The use of dualities and the concept of ambidextrous organizations as a frame of understanding is the innovative strength for this area **The New Workplace** David Holman, Toby D. Wall, Chris W. Clegg, Paul Sparrow, Ann Howard, 2003-07-07 Just in time total quality
