Managing The Commons:

Managing the Commons, Second Edition John A. Baden, Douglas S. Noonan, 1998-04-22 Garrett Hardin's seminal essay *The Tragedy of the Commons* appeared in 1968 and has been at the center of the debate on commonly owned ground or resources such as Western public grazing or the oceans. This is the second edition of a book exploring the issues raised in Hardin's essay. As scarce resources are increasingly strained, it is ever more crucial to identify those resources which are held in common and are therefore prone to tragic waste and abuses. The essays in this volume focus on alternate institutional approaches to managing these resources to prevent such tragedy.

Governing the Commons Elinor Ostrom, 2015-09-23 Tackles one of the most enduring and contentious issues of positive political economy: common pool resource management.

Managing the Commons John A. Baden, Douglas S. Noonan, 2017-08-15 Managing natural resources that are held in common is a great and grave challenge. It requires addressing the community of users, beneficiaries, and managers. It also requires consideration of how those communities interact with the commons itself. At stake is the prosperity and even survival of both the people and the environment. Understanding and improving how we relate to commons has been the focus of much scholarly and practical research in the last 30 years. A quick look at the various natural resource commons surrounding us indicates that this will no doubt continue. Pacific Northwest salmon fisheries represent a system of commons both complex and illustrative. My past history as administrator of the US Environmental Protection Agency and my fisherman's interest in salmon has heightened my sensitivity to the plight of the salmon and the people whose lives they affect. Recently my wife and I moved back to the Pacific Northwest, something the salmon try to do every year as they live out their inspiring life cycles. Unlike us, the salmon do not always find a hospitable environment when they return. There are many reasons. Simply put, there are more people in the salmon's way, and they struggle more with the problems that come with expanding human populations. A number of reports issued over the past few years have chronicled the broad declines and local extinction of many salmon, steelhead, and sea-run cutthroat stocks in the region. The people who fish for a living and the communities in which they live have been hit hard. Our resource agencies are in danger of being overwhelmed by the complexity and magnitude of the problem. Why are salmon faring so poorly? Who is responsible? What can be done to reverse the recent declines in salmon populations? When tragedy befalls a commons, as it has the salmon, I come to no conclusion about who is at fault, and I don't intend to. The one thing that I am certain of is that the only truly innocent parties in all of this are the salmon and the generations of people yet to come. It seems to me that the responsibility falls upon all of us—fishermen, resource managers, and concerned citizens alike—to take the steps necessary to ensure that salmon populations recover to the point that our children will be able to enjoy the quality of life we once took for granted. While many people focus on how to get the most from commons, groups like the Sustainable Fisheries Foundation emphasize providing and maintaining those natural resources. Their goal is deceptively simple: We are trying to put more salmon back in the rivers and

lakes of the Pacific Northwest Determining exactly how to accomplish this goal has defied the efforts of a great many dedicated and talented people Many papers and panel discussions especially reports on the status and trend of wild salmon populations in the North Pacific make it clear that many salmon stocks in parts of the lower United States southern British Columbia and the west coast of Vancouver Island are not faring well The decline in salmon numbers in these areas corresponds with a rapidly expanding human population alterations in land and water use increasing sediment and containment loads and heavy fishing pressure by a combination of sport commercial and tribal groups

Managing the Commons John Baden, Douglas S. Noonan, 1998 Managing the Commons Victoria M. Edwards, 1996 *Managing Small-scale Fisheries* Fikret Berkes, 2001 *Managing Small Scale Fisheries Alternative directions and methods* *Routledge Handbook of the Study of the Commons* Blake Hudson, Jonathan Rosenbloom, Dan Cole, 2019-01-04 The commons has come to mean many things to many people and the term is often used inconsistently The study of the commons has expanded dramatically since Garrett Hardin's *The Tragedy of the Commons* 1968 popularized the dilemma faced by users of common pool resources This comprehensive Handbook serves as a unique synthesis and resource for understanding how analytical frameworks developed within the literature assist in understanding the nature and management of commons resources Such frameworks include those related to Institutional Analysis and Development Social Ecological Systems and Polycentricity among others The book aggregates and analyses these frameworks to lay a foundation for exploring how they apply according to scholars across a wide range of disciplines It includes an exploration of the unique problems arising in different disciplines of commons study including natural resources forests oceans water energy ecosystems etc economics law governance the humanities and intellectual property It shows how the analytical frameworks discussed early in the book facilitate interdisciplinarity within commons scholarship This interdisciplinary approach within the context of analytical frameworks helps facilitate a more complete understanding of the similarities and differences faced by commons resource users and managers the usefulness of the commons lens as an analytical tool for studying resource management problems and the best mechanisms by which to formulate policies aimed at addressing such problems

The Jurisynamics of Environmental Protection Jim Chen, 2003 On November 1 and 2 2002 the University of Minnesota Law School and the University of Minnesota's Consortium on Law and Values in Health Environment and the Life Sciences sponsored a symposium in honor of Professor Daniel A. Farber's contributions to environmental law The resulting symposium *The Pragmatic Ecologist Environmental Protection as a Jurisdynamic Experience* was published in volume 87 of the Minnesota Law Review The Environmental Law Institute has now combined the proceedings of *The Pragmatic Ecologist* with additional contributions from many other leading scholars

Managing the Human Factor Bruce E. Kaufman, 2019-06-30 Human resource departments are key components in the people management system of nearly every medium to large organization in the industrial world. They provide a wide range of essential services relating to employees including recruitment, compensation, benefits, training, and labor relations. A century ago, however, before the concept of human resource management had been invented, the supervision and care of employees at even the largest companies were conducted without written policies or formal planning and often in harsh, arbitrary, and counterproductive ways. How did companies such as United States Steel manage a workforce of 160,000 employees at dozens of plants without a specialized personnel or industrial relations department? What led some of these organizations to introduce human resources practices at the end of the nineteenth century? How were the earliest personnel departments structured and what were their responsibilities? And how did the theory and implementation of human resources management evolve both within industry and as an academic field of research and teaching? In *Managing the Human Factor*, Bruce E. Kaufman chronicles the origins and early development of human resource management (HRM) in the United States from the 1870s when the Labor Problem emerged as the nation's primary domestic policy concern to 1933 and the start of the New Deal. Through new archival research, an extensive review and synthesis of the historical and contemporary literatures, and case studies illustrating best and worst practices during this period, Kaufman identifies the fourteen ideas, events, and movements that led to the creation of specialized HRM departments in the late 1910s, as well as their further growth and development into strategic business units in the welfare capitalism period of the 1920s. The research presented in this book not only uncovers many new aspects of the early development of personnel and industrial relations but also challenges central parts of the contemporary interpretation of the concept and evolution of HRM. Rich with insights on both the present and past of human resource management, *Managing the Human Factor* will be widely regarded as the definitive account of the early history of employee management in American companies and a must read for all those interested in the indispensable function of managing people in organizations.

Proleptic Leadership on the Commons Randal Joy Thompson, 2020-10-22 Will capitalism give way to a commons-centric society as many scholars and activists predict? Viewing the commons as a vehicle for a new world order, Randal Joy Thompson proposes proleptic leadership, which envisions how leaders will continue to be essential as the custodians of responsible agency and conscious choice.

The Commons in the New Millennium Nives Dolsak, Elinor Ostrom, 2003-02-14 Globalization, population growth, and resource depletion are drawing increased attention to the importance of common resources such as forests, water resources, and fisheries. It is critical that these resources be governed in an equitable and sustainable way. *The Commons in the New Millennium* presents cutting-edge research in common property theory and provides an overview and progress report on common property research. The book analyzes new problems that owners, managers, policy makers, and analysts face in managing natural commons. It examines recent findings

about the physical characteristics of the commons their complexity and interconnectedness and the role of social capital It also provides empirical studies and suggestions for sustainable development The topics discussed include the role of financial political and social capital in deforestation community efforts to gain political influence in Indonesia the Maine lobster industry outcomes of the implementation of individual transferable quotas in New Zealand and Iceland fisheries and design of multilateral emissions trading for regional air pollution and global warming

Perspectives on Long Term Community Resource Management Ludomir R. Lozny,Thomas H. McGovern,2019-06-21 Communal level resource management successes and failures comprise complex interactions that involve local regional and increasingly global scale political economic and environmental changes shown to have recurring patterns and trajectories The human past provides examples of long term millennial and century scale successes followed by undesired transitions collapse and rapid failure of collaborative management cooperation on the decadal scale Management of scarce resources and common properties presents a critical challenge for planners attempting to avoid the tragedy of the commons in this century Here anthropologists human ecologists archaeologists and environmental scientists discuss strategies for social well

being in the context of diminishing resources and increasing competition The contributors in this volume revisit tragedy of the commons also referred to as drama or comedy of the commons and examine new data and theories to mitigate pressures and devise models for sustainable communal welfare and development They present twelve archaeological historic and ethnographic cases of user managed resources to demonstrate that very basic community level participatory governance can be a successful strategy to manage short term risk and benefits The book connects past present future by presenting geographically and chronologically spaced out examples of communal level governance strategies and overviews of the current cutting edge research The lesson we learn from studying past responses to various ecological stresses is that we must not wait for a disaster to happen to react but must react to mitigate conditions for emerging disasters **Securing**

Common pool land and water resources in India play vital but often overlooked roles in livelihoods and ecosystem services These resources are subject to the authority of various government departments and are often managed in ways that result in uncertain tenure for the people who depend on these resources for fodder fuel water and other products An Indian NGO the Foundation for Ecological Security FES has developed a process for commoning assisting communities to secure the commons by forming inclusive local institutions to manage the resources and to work with different government departments to gain stronger rights to the commons This paper applies polycentricity theory to examine the institutional arrangements that govern the commons in FES sites in Andhra Pradesh and Karnataka states and assesses relationships that may affect commons management It draws on key informant interviews and village level social network mapping exercises Net mapping to show the complex flows of resources information and influence related to the commons among habitation level organizations local government resource agencies the rural employment guarantee program MGNREGA and NGOs This paper discusses the potential of this methodology as a diagnostic tool to help understand community perceptions of the role of various stakeholders in overall governance of the commons and can provide guidance for interventions to help communities to strengthen their tenure on the commons and management of those resources **Trends in Social**

Cohesion Council of Europe,2012-01-01 Annotation We are at a point in history where economic inequalities are more widespread each day The situation of extreme poverty experienced by the majority of the populations in developing countries Third World countries often coincides with an absence of democracy and the violation of the most fundamental rights But in so called First World countries a non negligible proportion of inhabitants also live in impoverished conditions albeit mainly relative poverty and are denied their rights The European situation which this publication aims to analyse is painful the entire continent is afflicted by increasing poverty and consequently by the erosion of living conditions and social conflicts The economic and financial crisis has resulted in the loss of millions of jobs and created job insecurity for many still working

Economic insecurity raises social tensions aggravating xenophobia for instance Yet the economic and financial crisis could present a good opportunity to rethink the economic and social system as a whole Indeed poverty in modern societies has never been purely a question of lack of wealth It is therefore urgent today to devise a new discourse on poverty In pursuit of this goal the Council of Europe is following up this publication in the framework of the project Human rights of people experiencing poverty co financed by the European Commission *Managing the Commons* Garrett Hardin,
