Being the Body of Christ in the Age of Management The Rev'd Lyndon Shakespeare, 2016-08-26 The church needs effective leaders We must be more missional Better organization is required Such sentiments are commonplace among Christians concerned with the health and sustainability of their local church as well as the church universal Over the past thirty years the desire for more efficiently run effectively led and organizationally sound churches has contributed to an approach to thinking about the church in terms uncritically assumed from the business and management sector This has given rise to treating the church as if it were just another social body in need of better organization The question is what happens when we apply the logic of management techniques to an organization that identifies as the body of Christ Drawing on organizational theory theological anthropology and sacramental theology this book navigates a path for Christians that avoids reducing the church to just another organization while providing a vision for the church as the social body where all

are invited to connect and be made members of Christ and each other Such a vision provides an alternative to the social categorization that would define the church by its organizational character rather than its eschatological destiny 101

Mackenzie, 2011-06-28 Previously the conventional wisdom about organizations was If it's not broken then don't fix it Today the new dictum seems to be If it works make it work better There is a shift from a posture of reaction to one that embraces change The prevailing wisdom is changing because many of our organizations are now or will soon be in a state of crisis Every day we read about a proud old firm going bankrupt manufacturers who must cut costs and retrench in order to survive and failures in our governmental agencies Who's next Many organizations are failing but others are doing well All wonder if something terrible could happen to their organization Thus it seems prudent to anticipate and proactively manage change rather than to passively sit by until some crisis strikes All of us know that any organization can be improved There will always be a gap between some desired state and our current reality There will always be differences among people about what is desirable and what is not Every change energizes these gaps Because there are so many changes taking place it is no wonder that there is continuous clamor for organizational change These gaps and differences are the source of problems Once a problem is recognized and agreed to efforts are made to generate a solution to it Every solution has both its intended and unintended consequences

management In fact various biblical figures from ancient Israelite kings to New Testament apostles all uniquely approach conflict Does the Bible have a theory of conflict management In Conflict Management and the Apostle Paul the authors explore how Paul approached conflicts with his close associates like Barnabas and Peter and with his mission churches like those in Galatia and Corinth Conflict Management and the Apostle Paul distinctively sketches how various theories of conflict management used today shed light on Paul s own approaches to conflict while also evaluating the conflicts themselves The authors in this volume are pastors and church workers who themselves bring their own experiences with conflict into play as they seek wisdom from the New Testament
