The Structure of Tone Zhiming Bao, 1999-05-20 This book argues a fresh theory about the structure of tone. Bao investigates a wide range of tone sandhi data from various Chinese dialects and other Asian tone languages, providing empirical support for his proposal that tone is a formal entity which consists of register and contour. Bao establishes a clear typological distinction between register tone languages and contour tone languages whose contour tones have a more complex structure.

The Tonology of Khoekhoe (Nama/Damara) Wilfrid H. G. Haacke, 1999

Language Interrupted John McWhorter, 2007-06-18 Foreigners often say that English language is easy A language like Spanish is challenging in its variety of verb endings the verb speak is conjugated *hablo hablas hablamos* and gender for nouns whereas English is more straight forward I speak you speak we speak But linguists generally swat down claims that certain languages are easier than others since it is assumed all languages are complex to the same degree For example they will point to English's use of the word *do* Do you know French This usage is counter intuitive and difficult for non native speakers Linguist John McWhorter agrees that all languages are complex but questions whether or not they are all equally complex The topic of complexity has become a hot issue in recent years particularly in creole studies historical linguistics and language contact As McWhorter describes when languages came into contact over the years when French speakers ruled the English for a few centuries or the vikings invaded England a large number of speakers are forced to learn a new language quickly and this came up with a simplified version a pidgin When this

ultimately turns into a real language a creole the result is still simpler and less complex than a non interrupted language that has been around for a long time McWhorter makes the case that this kind of simplification happens in degrees and criticizes linguists who are reluctant to say that for example English is simply simpler than Spanish for socio historical reasons He analyzes how various languages that seem simple but are not creoles actually are simpler than they would be if they had not been broken down by large numbers of adult learners In addition to English he looks at Mandarin Chinese Persian Malay and some Arabic varieties His work will interest not just experts in creole studies and historical linguistics but the wider community interested in language complexity Digital Media in East Asia ,
