SeaCities Joerg Baumeister, Edoardo Bertone, Paul Burton, 2020-11-28

This book presents and discusses a strategy which includes four approaches to dealing with the risk of sea level rise and other water hazards It also offers opportunities for cities to explore urban extensions such as marine estates aquatic food production systems new sea related industries maritime transport developments new oceanic tourist attractions and the designation of additional coastal ecological zones The urban interface between Sea and Cities generates therefore both burning issues and valuable opportunities and raises

the question of whether it is possible to solve the former by exploiting the latter

Franca,Daniel Valero,Victor Chavarrias,Clàudia Ylla Arbós,Ralph Schielen,Alessandra Crosato,2020-08-27 Rivers form one of the lifelines in our society by providing essential services such as availability of fresh water navigation energy ecosystem services and flood conveyance Because of this essential role mankind has interfered continuously in order to benefit most and at the same time avoid adverse consequences such as flood risk and droughts This has resulted in often highly engineered rivers with a narrow set of functions In the last decades rivers are increasingly considered in a more holistic manner as a system with a multitude of interdependent processes River research and engineering has therefore added to the river fundamentals also themes like ecohydraulics consequences of climate change and urbanisation River Flow 2020 contains the contributions presented at the 10th conference on Fluvial Hydraulics River Flow 2020 organised under the auspices of the Committee on Fluvial Hydraulics of the International Association for Hydro Environment Engineering and Research IAHR What should have been a lively physical gathering of researchers students and practitioners was converted into an online event as the COVID 19 pandemic hindered international travelling and large gatherings of people Nevertheless the fluvial hydraulics community showed their interest and to be very much alive with a high number of participations for such event Since its first edition in 2002 in Louvain la Neuve this series of conferences has found a large and loyal audience in the river research and engineering community while being also attractive to the new researchers and young professionals This is highlighted by the large number of contributions applying for the Coleman award for young researchers and also by the number of applications and attendants to the Master Classes which are aimed at young researchers and students River Flow 2020 aims to provide an updated overview of the ongoing research in this wide range of topics and contains five major themes which are focus of research in the fluvial environment river fundamentals the digital river the healthy river extreme events and rivers under pressure Other highlights of River Flow 2020 include the substantial number of interdisciplinary subthemes and sessions of special interest The contributions will therefore be of interest to academics in hydraulics hydrology and environmental engineering as well as practitioners that would like to be updated about the newest findings and hot themes in river research and engineering **Eco-design of Marine Infrastructures** Sylvain Pioch,Jean-Claude Souche,2021-09-16 This book offers

Mangrove Tree Links Yves Earhart, 2025-01-25 Mangrove Tree Links explores the extraordinary world of mangrove forests framing them as unsung heroes in the fight against climate change and biodiversity loss The book's central theme reveals how these salt tolerant trees form dynamic ecosystems that protect coastlines store vast amounts of carbon and sustain marine life Mangroves act as natural seawalls reducing storm surges by up to 66% while their soil sequesters carbon four times faster than terrestrial forests a critical yet underappreciated asset for climate mitigation Yet over 35% of global mangrove cover has vanished in 50 years largely due to aquaculture and urbanization making their conservation urgent Blending ecology and human stories the book progresses from mangrove biology to real world solutions Early chapters decode their unique adaptations like filtering salt through roots while later sections use satellite data and sediment studies to quantify their carbon storing superpower Case studies highlight their lifesaving role in tsunami prone Southeast Asia and hurricane battered Caribbean coasts The final chapters spotlight community led restoration in Indonesia and policy innovations in Brazil emphasizing how Indigenous knowledge and AI assisted replanting can revive these ecosystems What sets Mangrove Tree Links apart is its interdisciplinary lens connecting bacterial processes in root nodules to global climate goals and its actionable insights from advocating for blue carbon policies to supporting sustainable fisheries Written in vivid jargon free prose the book transforms complex science into relatable narratives like comparing mangrove roots to underwater apartment complexes sheltering fish and crabs By

adaptations of mangroves highlighting their exceptional ability to thrive in saltwater environments It examines how these coastal ecosystems function focusing on the plant physiology that allows mangroves to filter salt Mangroves are not just salt tolerant they are biological filters employing sophisticated mechanisms to regulate salt uptake excretion and storage This comprehensive understanding is crucial for effective conservation efforts The book progresses from an introduction to mangrove habitats and their global importance to a deep dive into salt filtration mechanisms such as salt exclusion at the roots and excretion through specialized glands It further explores the ecological roles of mangroves including their contributions to coastal food webs and their function as nurseries for marine organisms Ultimately the book addresses the future of these vital coastal ecosystems in the face of deforestation pollution and climate change advocating for mangrove restoration and environmental conservation
