Ages in Chaos III: Peoples of the Sea , Worlds in Collision Immanuel Velikovsky, 2009 Velikovsky presents the revolutionary results of his 10 year long interdisciplinary research into modern catastrophism based

The Pseudoscience Wars Michael D. Gordin, 2024-05-31 Properly analyzed the collective mythological and religious writings of humanity reveal that around 1500 BC a comet swept perilously close to Earth triggering widespread natural disasters and threatening the destruction of all life before settling into solar orbit as Venus our nearest planetary neighbor Sound implausible Well from 1950 until the late 1970s a huge number of people begged to differ as they devoured Immanuel Velikovsky's major best seller *Worlds in Collision* insisting that perhaps this polymathic thinker held the key to a new science and a new history Scientists on the other hand assaulted Velikovsky's book his followers and his press mercilessly from the get go In *The Pseudoscience Wars* Michael D Gordin resurrects the largely forgotten figure of Velikovsky and uses his strange career and surprisingly influential writings to explore the changing definitions of the line that separates legitimate scientific inquiry from what is deemed bunk and to show how vital this question remains to us today Drawing on a wealth of previously unpublished material from Velikovsky's personal archives Gordin presents a behind the scenes history of the writer's career from his initial burst of success through his growing influence on the counterculture heated public battles with such luminaries as Carl Sagan and eventual eclipse Along the way he offers fascinating glimpses into the histories and effects of other fringe doctrines including creationism Lysenkoism

parapsychology and more all of which have surprising connections to Velikovsky's theories. Science today is hardly universally secure and scientists seem themselves beset by critics, denialists, and those they label pseudoscientists as seen all too clearly in battles over evolution and climate change. *The Pseudoscience Wars* simultaneously reveals the surprising Cold War roots of our contemporary dilemma and points readers to a different approach to drawing the line between knowledge and nonsense.

Earth in Upheaval Immanuel Velikovsky, 2009. In this epochal book Velikovsky, one of the great scientists of modern times, completely revolutionizes the view of the evolution of the Earth, the formation of mountains and oceans, the origin of coal or fossils, the question of the ice ages, and the history of animal and plant species.

Atlantis in America Ivar Zapp, George Erikson, 1998. This text presents evidence for a new theory that the great stone spheres of Costa Rica and sighting stones throughout the Pacific were used to teach sea routes and constellation paths to navigators of the ancient world. It reveals substantial links between Meso America and Egypt and the Middle East.

Studies in Postcolonial Literature M. Q. Khan, Bijay Kumar Das, 2007. *Studies in Postcolonial Literature* contains twenty-three papers and two interviews with two eminent writers on different genres: poetry, fiction, short fiction, and drama of postcolonial literature. It deals with literatures in English outside the Anglo-American tradition. The book focuses on how postcolonial literature assumes an identity of its own in spite of the writers drawn from different countries with distinct national identities. This is a very useful book for the students as well as the teachers who intend to do an extensive study of postcolonial literature.

She Who Spins the Coils of Creation Leslene della-Madre, 2023-06-28. Leslene della Madre's book *She Who Spins Creation: Sacred Female Cosmology in the Electric Plasma Universe* is essential medicine and a much-needed balm for the spirit in these perilous times of toxic masculinity, toxic capitalism, toxic patriarchy, and the perpetuation of the annihilation of women's wisdom and power. Also known as the Inquisition in which female embodied existence and wisdom continue to be silenced, and every attempt to eradicate us, deny our culture, belittle, and erase our knowledge continues to unfold. It is also a master class in how to excavate and reclaim female embodied experience, wisdom, empowerment, and sovereignty. Della Madre exposes the misogyny inherent in patriarchal myth and science, from physics to molecular biology, delving into the mysteries of matter, the mammalian egg, mythologies of female origins, the Electric Universe, plasma cosmology, and much much more. She invites us to awaken to the reality of a truly female cosmology that has always reflected as above, so below, and always will, but that has been denied and subjected to nearly complete erasure in numerous ways by male-dominated realities. In doing so, she invokes us to challenge the amnesia of the ages, question all we have been told about who we are, where we come from, and who we can become. She implores us to feel our horns and wings again and reclaim a world in which we understand that we are all electric plasma beings intertwined and interconnected in tune with the cosmos, the greater organism. This is the way to heal the violence that has been done to the Earth, Nature, and women by thousands of years of patriarchal colonization. This book is also a clarion call for action for women to remember our magic and to seek

guidance from the ancestral realms to help restore us to whole holy ness This profound book should be made into a documentary series Mary Saracino author LAMBDA award finalist **Ages in Chaos I: From the Exodus to Kind Akhnaton , Ramses II and His Time , The Millennial Chronological Bible Info Book** Walter Curtis Lichfield,2005-03 The author presents a full and sequential examination of the most important and significant elements of the Bible Layman teacher and student of Biblical studies from the beginner to the most advanced will find much to dwell on within these pages Biblical Studies **Green Psychology** Ralph Metzner,1999-06-01 A visionary ecopsychologist examines the rift between human beings and nature and shows what can be done to bring harmony to both the ecosystem and our own minds Shows that the solution to our ecological dilemma lies in our own consciousnesses It is becoming more and more apparent that the causes and cures for the current ecological crisis are to be found in the hearts and minds of human beings For millennia we existed within a religious and psychological framework that honored the Earth as a partner and worked to maintain a balance with nature But somehow a root pathology took hold in Western civilization the idea of domination over nature and this led to an alienation of the human spirit that has allowed an unprecedented destruction of the very systems which support that spirit In Green Psychology Ralph Metzner explores the history of this global pathology and examines the ways that we can restore a healing relationship with nature His search for role models takes him from shamanic ceremonies with the Lacandon Maya of Mexico to vision quests in the California desert from the astonishing nature mysticism of Hildegard von Bingen to the Black Goddesses and Green Gods of our pagan ancestors He examines the historical roots of the split between humans and nature showing how first sky god worshiping cultures then monotheisms and finally mechanistic science continued to isolate the human psyche from the life giving Earth His final chapters present a solution showing that disciplines such as deep ecology and ecofeminism are creating a worldview in which the mind of humanity and the health of the Earth are harmoniously intertwined
