The M1 Garand Leroy Thompson, 2012-05-20 The M1 Garand gave the US infantryman a marked edge during World War II It shot faster and further than enemy infantry rifles and hit harder No less an authority on killing the enemy than General George S Patton called the Garand The greatest battle implement ever devised At a time when opposing forces were

armed with bolt action rifles US troops had a highly reliable self loader The eight round clips which were used to load the M1 Garand were however viewed with mixed emotions by the troops on the ground Some Army and Marine Corps troops allegedly felt that the distinctive twang as the Garand s clip was ejected when empty alerted the enemy that the soldiers were reloading and resulted in an attack But the Garand became the defining mankiller of the war despite its weight and magazine problems and many US combat veterans consider it one of the key reasons they survived the war [Description And Rules For The Management Of The Springfield Rifle, Carbine, And Army Revolvers](#) James Gilchrist Benton, Henry Metcalfe, United States Ordnance Dept, 2023-07-18 A critical resource for the American soldier during World War I this technical manual offers detailed information on the use and maintenance of two of the United States Army s most important firearms With clear diagrams and step by step instructions this manual was an indispensable tool for soldiers on the front lines This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant **Instructions in Rifle and Carbine Firing for the United States Army** Stanhope English Blunt, 1886 [Instructions in Rifle and Carbine Firing for the United States Army](#) Stanhope English Blunt, 2013-09 This historic book may have numerous typos and missing text Purchasers can usually download a free scanned copy of the original book without typos from the publisher Not indexed Not illustrated 1885 edition Excerpt PART IV CHAPTER I Targets 375 The simplest method of determining the proficiency of the soldier at any time is to divide the target into various divisions and to give to hits in these divisions a value constant for all points in any one space but increasing as the division lies nearer the central point of the target This method gives a sufficiently accurate expression for the results of the soldier s firing 376 As the targets used by the armies of different foreign nations are widely dissimilar both in the shape and the number and size of their various divisions it is not possible even if it were considered desirable to so arrange the targets for our service that any comparison can be instituted between the practice of our soldiers and those of more than any one foreign country It therefore seems preferable to select the shape and proportions suggested by the natural variations of the arm by the average degree and direction of the proficiency desired from and attainable by the soldier and by the distances considered sufficient for his instruction 377 The limited amount of ammunition and time available for practice have necessitated the selection of certain ranges for the soldier s instruction and the omission of others and while for many reasons it would be preferable to adopt for each of the chosen distances its appropriate target the additional complication and the added labor and expense that would result make it more desirable to employ the same target for at least two ranges

378 For the short range practice at 200 and 300 yards and for the instruction of the recruit at 100 yards one target will therefore be used For practice at the mid ranges 500 and 600 yards another target and for the longer ranges **Italian Small Arms of the First and Second World Wars** Ralph Riccio,2014 This is the first comprehensive work in either English or Italian to address Italian small arms used during World War I and World War II It describes each weapon and covers the developmental history and use of all Italian designed and produced pistols rifles submachine guns and machine guns used during both conflicts as well as prototype weapons and foreign weapons used by the Italians Other appendices cover bayonets accoutrements markings ammunition small arms manufacturing facilities Italian small arms designers production summaries and collector s notes It includes many previously unpublished photographs and background information on small arms producers ammunition production facilities and designers In addition to the new material it also corrects previously published errors about Italian weapons AUTHOR Ralph Riccio spent twenty years as a U S Army military intelligence officer He has written numerous magazine articles many in Italian as well as having authored several books dealing with Italian and Irish military equipment and history His native Italian fluency has enabled him to develop extensive contacts with Italian military history experts and to delve deeply into research on Italian weapons and history This latest book on Italian military small arms is the culmination of years of research on the subject ILLUSTRATIONS 608 b w and colour photographs *The Model 1891 Carcano Rifle* Giovanni Chegia,Alberto Simonelli,2016-05-27 This book is a complete history of the Italian Model 1891Carcano rifle and variants that served as Italy s standard service rifle in World War I and World War II It describes each major component of the weapon as well as addressing the development of each variant in detail One section of the book is devoted to all markings that have been identified including those on the receiver barrel sights magazine and stock Profusely illustrated extensive appendices list serial numbers production totals inspection procedures ammunition types ammunition clips ammunition boxes and packaging ballistics data accoutrements and the Model 1891 as used by Italy s national marksmanship association **Gewehr & Karabiner 98** Dieter Storz,2006
