embarks upon the study of anthroposophy will soon recognise that the mystery of the human ego lies at its very heart This mystery is one of the central questions of anthroposophical Christology and at the same time forms one of the most difficult cognitive challenges presented by anthroposophy Sergei O Prokofieff The question of the true nature of the human I or individuality is one of the key issues of our time but it is also one of the most complex riddles of existence This booklet doesn't give simple answers but adds perspectives that deepen the theme offering a picture of its manifold mysteries In three great panoramas the author develops central aspects of the topic beginning with the threefold nature of human individuality followed by an illumination of the cosmic dimension of the ego and finally an encapsulation of the significance of the earthly ego With his usual thoroughness and clarity Sergei O Prokofieff throws light on one of the fundamental questions of our time
