Mans Responsibility For Nature Ecological Problems And Western Tradition:

Man's Responsibility for Nature John Arthur Passmore,1974 **Man's Responsibility for Nature** J. Passmore,1980

Judaism and Environmental Ethics Martin D. Yaffe,2002-05-09 Martin D Yaffe s *Judaism and Environmental Ethics* A Reader is a well conceived exploration of three interrelated questions Does the Hebrew Bible or subsequent Jewish tradition teach environmental responsibility or not What Jewish teachings if any appropriately address today s environmental crisis Do ecology Judaism and philosophy work together or are they at odds with each other in confronting the current crisis Yaffe s extensive introduction analyzes and appraises the anthologized essays each of which serves to deepen and enrich our understanding of current reflection on Judaism and environmental ethics Brought together in one volume for the first time the most important scholars in the field touch on diverse disciplines including deep ecology political philosophy and biblical hermeneutics This ambitious book illustrates precisely because of its interdisciplinary focus how longstanding disagreements and controversies may spark further interchange among ecologists Jews and philosophers Both accessible and thoroughly scholarly this dialogue will benefit anyone interested in ethical and religious considerations of contemporary ecology

Man's Responsibility for Nature John Passmore,1986 **Nature in Asian Traditions of Thought** J. Baird

Callicott,Roger T. Ames,1989-04-21 Here Western environmental philosophers and some of our most distinguished representatives of Asian and comparative philosophy critically consider what Asia has to offer The first section provides an ecological world view as a basis for comparison Subsequent sections include chapters by leading contemporary scholars in Chinese Japanese Indian and Buddhist thought that explore the Western perception of Asian traditions the perception that Asian philosophy is a rich conceptual resource for contemporary environmental thinkers Nature and Life Md. Munir Hossain Talukder,2018-07-27 This volume explores some recent thoughts and trends in environmental philosophy and applied ethics The topics selected here are contemporary and offered in academic programs across the globe This book is an essential reference work for those who are keen to conduct detailed research within the fields of environmental philosophy environmental humanities culture public health applied ethics bioethics and political philosophy as well as the general reader interested in the ethical and philosophical issues that are transforming and touching our lives The book uniquely focuses both western and non western approaches Nature, Technology, and Society Victor Ferkiss,1994-11 Traces cultural attitudes toward the environment and technology across the span of human civilization While all human societies have enlisted technologies to control nature the last hundred years have witnessed the technological exploitation and destruction of natural resources on an unprecedented scale As environmental groups and the scientific community sound the alarm about deforestation global warming and ozone depletion the obvious question arises how did we get where we are today In *Nature Technology and Society* Victor Ferkiss sets out to answer this central question arguing that we cannot escape from our present environmental predicament unless we understand the ideas which have created it Ferkiss asks the basic questions

concerning humans and their relationship to the environment He traces cultural attitudes towards the environment from early mankind to the present day This fascinating book is distinctive both in its comprehensiveness and in its attempt to place side by side influential thinkers and movements with varied views on these issues *Key Thinkers on the Environment* Joy A. Palmer Cooper, David E. Cooper, 2017-09-14 *Key Thinkers on the Environment* is a unique guide to environmental thinking through the ages Joy A Palmer Cooper and David E Cooper themselves distinguished authors on environmental matters have assembled a team of expert contributors to summarize and analyse the thinking of diverse and stimulating figures from around the world and from ancient times to the present day Among those included are philosophers such as Rousseau Kant Spinoza and Heidegger activists such as Chico Mendes and Wangari Maathai literary giants such as Virgil Goethe and Wordsworth major religious and spiritual figures such as Buddha and St Francis of Assisi eminent scientists such as Darwin Lovelock and E O Wilson Lucid scholarly and informative the essays contained within this volume offer a fascinating overview of humankind's view and understanding of the natural world **Ecological Jurisprudence** Alessandro Pelizzon, 2025-01-11 This open access book explores the rise of ecological jurisprudence a transformative legal theory that challenges traditional legal boundaries Drawing on over 15 years of research and teaching the book offers a comprehensive theoretical exploration of this new approach to law via a comprehensive examination of a wide range of initiatives from around the world as well as a deep theoretical engagement with the implications of this novel legal theory Covering a breadth of topics never before brought together with such clear and wide ranging scope this book points to the emergence of an ecological jurisprudence not only as a profound transformation of legal norms but as a radical reimagination of law itself and serves as a vital resource for scholars and practitioners interested in the future of environmental law Along with Stone's *Do Trees Have Standing* 1972 Cullinan's *Wild Law* 2002 and the Ecuadorian Constitution 2008 we can now name Pelizzon's *Ecological Jurisprudence* as a key milestone in the field Herman F Greene JD DMin Thomas Berry Scholar in Residence The Earth Law Center An immense gift to the field and to generations of lawyers to come *Ecological Jurisprudence* contains teachings from which one could learn for a lifetime Katarina Hovden University of Copenhagen Alessandro Pelizzon's *Ecological Jurisprudence* is deeply rooted in how the law can best serve the natural world inspiring future lawyers with the kind of jurisprudence the natural world so urgently needs to exist Maria Mercedes Sanchez Former Coordinator of the United Nations Harmony with Nature Programme Pelizzon coins the term ecological jurisprudence and mobilises it to create deep normative foundations for future environmental law developments Any serious environmental scholar will have to engage with him because of the breadth and depth of what he achieves in this book Professor Afshin Akhtar Khavari QUT *Modernizing Nature* S. Ravi Rajan, 2006-02-16 *Modernizing Nature* contributes to the debate regarding the origins institutionalization and politics of the sciences and systems of knowledge underlying colonial frameworks of environmental management It departs from the widely prevalent scholarly perspective that colonial science can be understood predominantly as a handmaiden of imperialism

Instead it argues that the myriad colonial sciences had ideological and interventionist traditions distinct from each other and from the colonial bureaucracy and that these tensions better explain environmental politics and policy dilemmas in the post colonial era Professor Rajan argues that tropical forestry in the nineteenth century consisted of at least two distinct approaches towards nature resource and people and what won out in the end was the Continental European forestry paradigm Rajan also shows that science and scientists were relatively marginal until the First World War It was the acute scientific and resource crisis felt during the War along with the rise of experts and expertise in Britain during that period and the lobby politics of an organized empire wide scientific community that resulted in resource management regimes such as forestry beginning to get serious state backing Over time considerable differences in approach and outlook towards policy emerged between different colonial scientific communities such as foresters and agriculturists These different colonial sciences represented different situated knowledges with different visions of nature people and empire and in different configurations of power Finally in a panoramic overview of post colonial developments Rajan argues that the hegemony of these state scientific regimes of resource management during the period 1950 1990 engendered not just social revolt as recent historical work has shown but also intellectual protest Consequently the discipline of forestry became systematically re conceptualized with new approaches to silviculture economics law and crucially with new visions of modernity This disciplinary change constitutes nothing short of a cognitive revolution one that has been brought about by a clearly articulated political perspective on the orientation of the discipline of forestry by its practitioners

Eco-socialism as Politics Qingzhi Huan, 2010-03-11 This volume consists of analyses by experts from both the West and the East on the up to date development of Eco socialism as a red green politics within the context of capitalist globalisation It investigates whether and or in what sense Eco socialism can offer a better explanation to the causes of ecological problems than the other Green discourses such as deep ecology and ecological modernisation theory and thus has more contributions to make in dealing with the deteriorating ecological crisis throughout the world

Animals and Christianity Andrew Linzey, Tom Regan, 2007-11-01 What does the Christian tradition say about the condition and rights of animals This helpful and timely anthology of selections from the Bible and from the great Christian thinkers of all times is an essential primer for those who care about animals The book is organized around four themes Attitudes to Creation the Problem of Pain the Question of Animal Redemption and Reverence Responsibilities and Rights and concludes with a section on practical issues Animal Experimentation Fur Trapping Hunting for Sport Intensive Farming and Killing for Food This book includes selections from the following the Bible St Thomas Aquinas St Augustine Karl Barth St Bonaventure John Calvin Rene Descartes Austin Farrer John Hick St Irenaeus St John of the Cross C S Lewis St Thomas More E F Schumacher Albert Schweitzer Paul Tillich Leo Tolstoy Alec Vidler John Wesley and others

Saving Nature Tarjei Rønnow, 2011 Environmentalism has moved into the center of the most influential social movements in late modernity From preserving pre industrial landscapes advocating the

intrinsic value of nature and protecting ecosystems against overexploitation it has developed into a worldview ethos and practice that is radically shifting the frontiers of politics economics and ethics Saving Nature approaches environmentalism as a belief system The book explores the impact of environmentalism on faith communities and vice versa and analyzes how environmental worldviews values attitudes and discourses affect religion By drawing on sources in the sociology of religion and environmental sociology it sheds light on the religious dimensions of environmentalism It locates the quick growth of environmentalism in the history of allegedly secular modernity and interprets environmentalism in the context of modernity's re-sacralization Series Studies in Religion and the Environment Studien zur Religion und Umwelt Vol 4 *Environment and Development* Amitava Mukherjee, V. K. Agnihotri, 1993 Contributed articles **Holistic Bioethics** Jude Thaddaeus Buyondo, 2024-10-31 In pursuing a holistic bioethics while dialoguing with different sciences appreciation of moral affinities between human and nonhuman entities Dr Buyondo argues for a minimum moral status for nonhuman entities The minimum normative basics of approaches to biomedical ethics are at the very least not distinctive to either human animals or nonhuman animals only The investigation builds further on the African understanding of life where no creation is lifeless In establishing a more inclusive functional bioethics the African approach goes further than biocentrism ecocentrism and holism to ground an inclusive African holistic moral egalitarianism suggesting that all forces and all created things have life We are not emphasizing how every system and creature command equal respect rather everything has life commands respect and moral concern as a minimum imperative within a Black African holistic approach to bioethics However holistic bioethics can neither be Western nor an African invention that people of other cultures only admire from a distance Moreover holistic bioethics doesn't offer the last word on the ethics of nonhuman animals holistic anamnestic solidarity the relational Other and intercultural theological bioethics Religion and Ecological Crisis Todd LeVasseur, Anna Peterson, 2016-07-01 In 1967 Lynn White Jr's seminal article The Historical Roots of Our Ecologic Crisis was published essentially establishing the academic study of religion and nature White argues that religions particularly Western Christianity are a major cause of worldwide ecological crises He then asserts that if we are to halt let alone revert anthropogenic damages to the environment we need to radically transform religious cosmologies White's hugely influential thesis has been cited thousands of times in a variety of disciplines including but not limited to religious studies environmental ethics history ecological science philosophy psychology and anthropology In practical terms the ecological crisis to which White was responding has only worsened in the decades since the article was published This collection of original essays by leading scholars in a variety of interdisciplinary settings including religion and nature environmental ethics animal studies ecofeminism restoration ecology and ecotheology considers the impact of White's arguments offering constructive criticism as well as reflections on the ongoing ever-changing scholarly debate about the way religion and culture contribute to both environmental crises and to their possible solutions Religion and Ecological Crisis addresses a wide range of topics related to White's thesis including its significance for

environmental ethics and philosophy the response from conservative Christians and evangelicals its importance for Asian religious traditions ecofeminist interpretations of the article and which perspectives might have ultimately been left out of his analysis This book is a timely reflection on the legacy and continuing challenge of White s influential article

International Organization and the Conservation of Nature Robert Boardman,1981-06-18 Global Forest Governance R. Maguire,2013-03-01 This work provides an important broad and legal critique and assessment of

transnational trends structures and innovations currently in use for managing forests **Moneta's Veil: Essays in Nineteenth Century Literature** Malabika Sarkar,2009 Moneta s Veil Essays in Nineteenth Century Literature seeks to uncover relatively unexplored aspects of nineteenth century literature and culture important not as hidden curiosities but as issues that are relevant challenging and significant to our understanding of the nineteenth century A fascinating and well researched contribution to the continuing process of rediscovering the nineteenth century this volume will be valuable to scholars and students of English literature and feminist and social history Karl Marx's Ecosocialism Kohei

Saito,2017-10-24 Delving into Karl Marx s central works as well as his natural scientific notebooks published only recently and still being translated the author argues that Karl Marx actually saw the environment crisis embedded in captialism The book shows us that Marx has given us more than we once thought that we can now come closer to finishing Marx s critique and to building a sustainable ecosocialist world Page 4 of cover
