

The book cover features a photograph of a forest with tall, slender trees and a dense canopy. The lighting is dramatic, with bright highlights on the tree trunks and deep shadows in the foliage, creating a sense of depth and mystery. The overall color palette is dominated by dark greens and browns, with some lighter areas where the sun hits the trees.

Mans Dominion The Story Of Conservation In America:

Man's Dominion Frank Graham,1971 The story of men and women who shaped the conservation movement in America from the late 19th century to the present is a story of controversy failure and intermittent triumph Ironically many of the dedicated leaders of the earliest animal protection movements were hunters themselves motivated as much by a desire to enhance their sport as by conscience Many more worked simply out of moral conviction Often using their own words Frank Graham tells of Guy Bradley Gifford Pinchot John Muir Steve Mather William Temple Hornaday Rosalie Edge Rachel Carson and more The Progressive Era in the USA: 1890-1921 Kristofer Allerfeldt,2017-05-15 Few periods in American history have been explored as much as the Progressive Era It is seen as the birth place of modern American liberalism as well as the time in which America emerged as an imperial power Historians and other scholars have struggled to explain the contradictions of this period and this volume explores some of the major controversies this exciting period has inspired Investigating subjects as diverse as conservation socialism or the importance of women in the reform movements this volume looks at the lasting impact of this productive yet ultimately frustrated generation s legacy on American and world history

Fur, Fortune, and Empire: The Epic History of the Fur Trade in America Eric Jay Dolin,2010 For all of fur s contentious position in American culture today historian Eric Jay Dolin shows its centrality in our nation s ever surprising history He argues that the trade in animal skins turned colonial America into a tumultuous frontier where global powers battled for control From the seventeenth century right on up to the Gilded Age the developed world s appetite for fur made the new continent with its wealth of fur bearing wildlife a seemingly inexhaustible resource The result was a major boost in the evolution of the colonies into a powerful new player on the world stage Dolin sheds insight on the ways the fur trade created international tensions in New England the Great Lakes and in the expanding West Fur traders were often the first white men to map major rivers forests and mountains then soon pushed Native Americans off their lands as John Jacob Astor s American Fur Company attempted to monopolize the West From publisher description

U.S. Environmental Protection Agency Library System Book Catalog United States. Environmental Protection Agency. Library Systems Branch,1975 **Gulls** Frank Graham,2013-03-06 This is the story of those marvelously adaptable birds the gulls and the most destructive of animals man Over the past 150 years man s actions have thrown some species of

gulls totally out of context with their world yet they have managed not only to survive but for better or worse to multiply at a rate that matches man's own. Nature fitted the forty-four species of gulls to be efficient predators and scavengers and for hundreds of years they lived the precarious existence of wild things foraging along the shore and feeding on birds' eggs and nestlings. When man arrived on the scene they rapidly learned to follow the fishing boats and even went into the fields to eat the insects turned up by the plow at one point saving an entire harvest by consuming swarms of grasshoppers. The nineteenth-century craze for plumage on women's fashions nearly extirpated several kinds of gulls from our coasts. At last naturalists and concerned laymen established bird protection societies to halt the indiscriminate slaughter. Then a new element entered the scene: open garbage dumps. The graceful predators became omnipresent scavengers whose population explosion for a time seemed to have no end whose range extended year after year whose feet carried contaminants from dumps to reservoirs who endangered aircraft and who destroyed colonies of terns and puffins by consuming their eggs and young. Man's latest relations with gulls have been programs aimed at poisoning them and smashing their eggs. Yet the gull remains the attractive remarkable bird it always was. It is only man that has turned it into a pest. In addition to relating this pointed ecological case history, *Gulls* presents a handsomely illustrated account of the gull's natural life highlighting those seen in America: the familiar Herring Gull, the Great Black-backed, the Ring-billed, the Kittiwake and the Laughing Gull with vivid accounts of the author's trips to gull islands both to watch the egg destruction program and to study gull colonies. *The Adirondack Park* Frank Graham, Jr., 1991-10-01 *The Johnson Years: Vietnam, the environment, and science* Robert A. Divine, 1987

Advances in Archaeological Method and Theory Michael B. Schiffer, 2014-06-30. *Advances in Archaeological Method and Theory* Volume 5 presents the progressive explorations in methods and theory in archaeology. This book provides information pertinent to the developments in urban archaeology. Organized into nine chapters, this volume begins with an overview of cultural resource management developed to assess the significance of and to manage the cultural resources on public lands. This text then explores the basic aspects of natural and human-caused changes on the portion of the archaeological resource base consisting of archaeological sites. Other chapters consider the practice of urban archaeology in the United States with emphasis on the relationships between human behavior and material culture in an urban setting. This book discusses as well the applications of computer graphics in archaeology. The final chapter deals with the types of skeletal and population changes that accompany malnutrition. This book is a valuable resource for anthropologists, archaeologists, urban planners and graduate students.
