Vélez, Javier Giovanni Álvarez, Miguel Benavides, Homero Mora, Jairo Castaño Zapata, Lilliana Hoyos Carvajal, Alex Marín, Aníbal Herrera, Alexy Flórez, 2012-01-01 La fruticultura es sin duda alguna una de las actividades más emocionantes del ámbito agrícola. En todas las épocas las frutas han jugado un papel muy importante en la nutrición del hombre. El hombre logró aprovechar las distintas especies silvestres y crear a través del fitomejoramiento continuo variedades más grandes y con mejores cualidades. Los antiguos romanos sabían sobre la poda, el injerto y el raleo de frutos pero no comprendían por qué estas prácticas eran benéficas; sin embargo, aun ahora no existen explicaciones adecuadas para fenómenos de incompatibilidad de injertos y de resistencia a enfermedades. La fruticultura es descrita como una mezcla armónica de ciencia y arte basándose además en el conocimiento de la fisiología de la planta en los conocimientos de otros campos como la geografía, la climatología, la meteorología, la edafología, la química, la física, la nutrición, la genética, la patología, la entomología, la economía, la comercialización y el manejo de los recursos naturales.
