Mutative Metaphors In Psychotherapy The Aeolian Mode:

Mutative Metaphors in Psychotherapy Murray Cox, Alice Theilgaard, 1987 This imaginative psychotherapy considers the aim of the Aeolian Mode is to release an individual's creative energy by freeing that person from the restrictive legacy of the past

Decolonising Counselling and Psychotherapy Dwight Turner, 2025-03-04 Decolonisation is a term which has become a modern day buzzword as we look to understand the influences of the systemic structures of oppression which have molded all of our identities yet in the worlds of counselling and psychotherapy there has been a struggle to understand what this term means in regard to our profession Decolonising Counselling and Psychotherapy considers the ways in which the systems of colonization have taken over and are continually reconstituted within our profession This book challenges our profession by offering practical ways in which we might diversify our practices proffering varying perspectives about how to create pathways for greater inclusion in training courses and examines the many opportunities to explore and expand the ways in which we undertake research Most importantly it will encourage the therapist to look at the internalised experiences of colonisation on themselves The book shows that working creatively with techniques common to counselling and psychotherapy could lead the profession to not only broaden out what it knows and understands of human nature but through a process of decolonisation assist in meeting the needs of a wider range of clients This book will be invaluable to counsellors psychotherapists and psychologists working in the helping professions and to those whose activism drives them to want to make our helping professions more inclusive and equitable

Play and Power Liselotte Grunbaum, Karen Vibeke Mortensen, 2018-05-08 The power of play so central to psychoanalytic theory and practice is conjoined to the social psychological or socio politically coloured concept of power giving rise to many fruitful discussions of how these concepts manifest themselves in clinical work with children groups and adults The inspiration for this book was the 3 section EFPP conference in Copenhagen in May 2007 with the main theme Play and Power At the conference and in the book this theme is presented both inside and outside the therapeutic space It is amply illustrated in clinical cases from individual psychotherapies with children and adults and from group analysis Most of the examples are with hateful or resigned children and adults who have been exposed to extremely damaging or unhelpful environments and who demonstrate convincingly some of the devastating consequences that abuse of power in the real world may have Play and power are also explored in the broader context of the community however

The Anti-Group Morris Nitsun, 2014-09-19 The anti group is a major conceptual addition to the theory and practice of group psychotherapy It comprises the negative disruptive elements which threaten to undermine and even destroy the group but when contained have the potential to mobilise the group's creative processes Understanding the anti group gives therapists new perspectives on the nature of relationships and alternative strategies for managing destructive behaviour

The Therapeutic Use of Stories Kedar Nath Dwivedi, 2006-10-19 The potential for healing available in well known myths and stories is increasingly recognized but many practitioners are unsure

how to tap into this rich and often culturally specific source of insight What sort of story is best for what sort of situation How can it be introduced naturally into the session What is the best way of using the story These are some of the questions contributors to this book set out to answer They explore the historical and cultural context of story telling and provide examples of specific stories for specific situations Covering emotional themes such as anger anxiety fear shame guilt separation and bereavement the authors show how they work through stories with many different kinds of client groups and individuals of all ages in educational health and social science settings The *Therapeutic Use of Stories* provides a sound theoretical framework for the use of stories examples of stories with a high therapeutic value and practical advice on how to use them to best effect

Dramatherapy: Theory and Practice 2 Sue Jennings, 2013-06-17 Dramatherapy Theory and Practice 2 provides both clinician and theatre artist with a basic overview of recent developments in dramatherapy The international contributors all practising dramatherapists or psychotherapists offer a wide variety of perspectives from contrasting theoretical backgrounds showing how it is possible to integrate a dramatherapeutic approach into many different ways of working towards mental health

Trauma Thom Spiers, 2018-09-03 In recent years a number of high profile disasters have heightened public awareness of the impact of trauma This book offers a comprehensive guide to all aspects of trauma counselling covering trauma assessment resourcing the trauma client trauma aftercare working with trauma in private practice trauma and the therapist a brief history of trauma This practical and effective guide to trauma counselling will be invaluable to counsellors GPs social workers human resource managers emergency response organisations and all those involved in treating trauma victims using counselling skills

Shakespeare as Prompter Murray Cox, Alice Theilgaard, 1994 Prompting is the thematic thread that pervades the pages of this book Its primary connotation is that of the prompter who is urgently called into action at moments of anxiety when narrative begins to fail The central dynamic issue concerns the amending imagination as a prompting resource which through creativity and the aesthetic imperative can be invoked in this therapeutic space when the patient through fear resistance or distraction is unable to continue with his story Psychotherapy can be regarded as a process in which the patient is enabled to do for himself what he cannot do on his own Shakespeare as the spokesman for all other poets and dramatists prompts the therapist in the incessant search for those resonant rhythms and mutative metaphors which augment empathy and make for deeper communication and which also facilitates transference interpretation and resolution The cadence of the spoken word and the different laminations of silence always call for more finely tuned attentiveness than the therapist unprompted can offer The authors show how Shakespeare can prompt therapeutic engagement with inaccessible patients who might otherwise be out of therapeutic reach At the same time they demonstrate that the clinical off stage world of therapy can also prompt the work of the actor in his on stage search for representational precision

Enabling Recovery Glenn Roberts, 2006 People with complex and long term mental health needs are at the heart of current priorities in service development Rehabilitation psychiatry offers a positive response to

their problems needs and aspirations The central ambitions of contemporary rehabilitation services are to rekindle hope and to open routes to personal recovery while accepting and accounting for continuing difficulty and disability **Children and Adolescents in Trauma** Chris Nicholson, Michael Irwin, Kedar Nath Dwivedi, 2010 Children and Adolescents in Trauma presents a variety of creative approaches to working with young people in residential children's homes secure or psychiatric units and special schools and provides useful insights and a fresh perspective for anyone working with traumatised children and adolescents
