The Passion for Pelargoniums Anne Wilkinson, 2007-05-24 Quick and reliable to grow for summer colour and well marketed most gardeners will have at least one pelargonium in their garden or conservatory without realising either the

number or variety of species available nor the plant's extraordinary history. The Passion for Pelargoniums reveals the fascinating and dramatic tales of those who have been involved in finding, classifying, collecting, and breeding the plants. It explodes the myth that all modern versions of the plant are descended from the oldest known variety, the seventeenth-century drab coloured P. triste, literally translated as the sad pelargonium, and reveals that 2,000 hybrids have been developed from less than a dozen plants originally imported from the East. From the contribution of L. Heritier, whom Sir Joseph Banks named an impudent Frenchman, to collectors like Masson and the Marquess of Blandford, known for his elegant emporium, competing nurserymen determined to make both fortunes and reputations, and the burgeoning Victorian varieties as growers searched for the holy grail of the scarlet geranium, the book recounts the plant's extraordinary history. Today, while traditional white ones, double nosegays, and rosebuds still flourish, the lemon-scented geranium is only one of a number of scented varieties, while pelargoniums can have flowers of pink, red, purple, yellow, or black. This is the story of how the passion felt by gardeners for their plants stirred them to bitter rivalry and criminal obsession, scandal, fraud, and fast dealing, and saw polite society being rather less than polite.

The Poetry of Erasmus Darwin Martin Priestman, 2016-02-24 While historians of science have focused significant attention on Erasmus Darwin's scientific ideas and milieu, relatively little attention has been paid to Darwin as a literary writer. In *The Poetry of Erasmus Darwin: Enlightened Spaces*, Romantic Times, Martin Priestman situates Darwin's three major poems, *The Loves of the Plants* (1789), *The Economy of Vegetation* (1791), and *The Temple of Nature* (1803), and Darwin himself within a large polymathic late Enlightenment network of other scientists, writers, thinkers, and social movers and shakers. Interpreting Darwin's poetry in terms of Darwin's broader sense of the poetic text as a material space, he posits a significant shift from the Enlightenment's emphases on conceptual spaces to the Romantic period's emphases on historical time. He shows how Darwin's poetry illuminates his stance toward all the major physical sciences and his well-formulated theories of evolution and materially based psychology. Priestman's study also offers the first substantial accounts of Darwin's mythological theories and their links to Enlightenment Rosicrucianism and Freemasonry, and of the reading of history that emerges from the fragment poem *The Progress of Society*, a first ever printed edition of which is included in an appendix. Ultimately, Priestman's book offers readers a sustained account of Darwin's polymathic Enlightenment worldview and cognate poetics in a period when texts are too often judged by their adherence to a retrospectively constructed Romanticism.

[Picturing the Pacific](#) James Taylor, 2018-09-20 For over 50 years between the 1760s and the early 19th century the pioneers who sailed from Europe to explore the Pacific brought back glimpses of a new world in the form of oil paintings watercolors and drawings a sensational view of a part of the world few would ever see Today these works represent a fascinating and inspiring perspective from the frontier of discovery It was Sir Joseph Banks President of the Royal Society who popularized the placement of professional artists on British ships of exploration They captured striking and memorable images of everything they encountered exotic landscapes beautiful flora and fauna as well as remarkable portraits of indigenous peoples These earliest views of the Pacific were designed to promote the new world as enticing to make it seem familiar to encourage further exploration and ultimately British settlement Drawing on both private and public collections from around the world this lavish book collects oil paintings watercolors drawings prints and other documents from those voyages and presents a unique glimpse into an age where science and art became irrevocably entwined
