Myth Of Property Toward An Egalitarian Theory Of Ownership:

The Myth of Property John Christman, 2023 This treatise focuses directly on the concept of ownership on the complex structure of property rights and the relation between that structure and distributive justice **Deliberative Democracy, Political Legitimacy, And Self-determination In Multi-cultural Societies** Jorge Valadez, 2018-03-09 Most foundational works in political philosophy have made fundamentally false and far reaching assumptions concerning the culturally homogeneous character of the polity Deliberative Democracy Political Legitimacy and Self Determination in Multicultural Societies provides a much needed corrective to conventional accounts of the normative foundations of the state by reconceptualizing some of the fundamental issues in political theory from a perspective that recognizes the culturally pluralistic character of contemporary democracies Among the issues considered are democratic deliberation in multicultural societies the justification and function of political communities the nature of self determination the justification of cultural rights and the moral rationale for regional self governance and secession This work is suitable for graduate and upper division undergraduate courses in political philosophy and political science as well as the lay reader interested in understanding the major sources of conflict and instability in democratic societies Multicentrism as an Emerging Paradigm in Legal Theory Marek Zirk-Sadowski, Mariusz Jerzy Golecki, Bartosz Wojciechowski, 2009 The contemporary legal theory is gradually departing from traditional theory of the hierarchical legal system Some authors announce the supposed death of the concept of law within the state The so called multicentrism might become an attractive alternative to the traditional monocentric approach The essence of multicentrism may be characterized as coexistence of many adjudicating bodies especially courts whose verdicts are equally effective within the national legal system Such a situation takes place e g within the European legal area where multicentrism could be perceived as the existence of sensitive liaisons entanglements and relations of dependence between the European Court of Human Rights in Strasbourg the European Court of Justice in Luxemburg and national especially constitutional courts in member states The coexistence of many centres of adjudication may thus become a constant feature of the system of regional and global law **Toward the Reform of Private Waqfs** Hamid Harasani, 2015-10-05 Using a combination of the comparative legal method and hermeneutics this book reconciles Islamic law with English trust s law in these two main areas It does not find it necessary for one legal system to reign supreme over the other as such solutions will be questioned by the internal subjects of the dominated legal system undermining the efficacy of this study Rather reconciliation is a mutual step to congruence taken by both legal systems In the area of perpetuities the book finds that neither Islamic Waqfs must be perpetual nor common law trusts must have a rule against perpetuities Regarding ownership theories the multiplicity of rendered theories in both legal systems presents more than one avenue of reconciliation Overall the study finds that private Waqfs and private trusts can be reconciled without undermining the internal hermeneutic standpoints of both legal systems **The SAGE Encyclopedia of Business Ethics**

and Society Robert W. Kolb, 2018-03-27 Thoroughly revised updated and expanded The SAGE Encyclopedia of Business Ethics and Society Second Edition explores current topics such as mass social media cookies and cyber attacks as well as traditional issues including accounting discrimination environmental concerns and management The new edition also includes an in depth examination of current and recent ethical affairs such as the dangerous work environments of off shore factories for Western retailers the negligence resulting in the 2010 BP oil spill the gender wage gap the minimum wage debate and increasing income disparity and the unparalleled level of debt in the U S and other countries with the challenges it presents to many societies and the considerable impact on the ethics of intergenerational wealth transfers Key Features Include Seven volumes available in both electronic and print formats contain more than 1 200 signed entries by significant figures in the field Cross references and suggestions for further readings to guide students to in depth resources Thematic Reader s Guide groups related entries by general topics Index allows for thorough browse and search capabilities in the electronic edition

Engaging the Everyday John M. Meyer, 2015-03-13 Meyer pioneers a uniquely political approach to environmental social criticism that follows from a startling central proposition that it is not outright oppression and denialism that are the most significant impediments but what he aptly terms the resonance dilemma This is the failure of climate and environmental challenges however important we may grant that they are to strike us as integral everyday concerns This lively eloquent accessible volume models the very style of social criticism that it calls

for in response to this dilemma a resonant environmental criticism that works on rather than against everyday practices Lisa Disch Department of Political Science University of Michigan Ann Arbor author of *Hannah Arendt and the Limits of Philosophy*

Laws of Creation Ronald A. Cass, Keith N Hylton, 2013-01-01 Cass and Hylton explain how technological advances strengthen the case for intellectual property laws and argue convincingly that IP laws help create a wealthier more successful more innovative society than alternative legal systems Ignoring the social value of IP rights and making what others create free would be a costly mistake indeed

Towards a Four-Tiered Model of Mediation Hugo Luz dos Santos, 2023-02-13 Underpinned by a hybrid methodology ranging from social sciences to human sciences this book parses mediation in four perspectives which stands as an unparalleled methodological approach so far Mediation has long been tethered to piecemeal and haphazard approaches which have flatly failed to capture the gist of the uniqueness of this often poorly latched on and poorly understood dispute resolution mechanism This book argues that in order to fully grasp the richness of such dispute resolution mechanism mediation must be parsed in four tiers The first tier is the social dynamics of mediation The second tier is the cultural dynamics of mediation The third tier is the legal dynamics of mediation The fourth tier is the cross border and cross cultural dynamics of mediation Taken together the four tiers that premise the four tiered model of mediation seek to unlock the finding in view of which law and social reality are tightly interlocked In this vein it is the underlying social reality of a given jurisdiction that should dictate the design of a pre suit court connected mandatory mediation with an easy opt out a central claim of both social dynamics of mediation the first tier of the four tiered model of mediation and legal dynamics of mediation the third tier of the four tiered model of mediation

Autonomy and the Challenges to Liberalism John Christman, Joel Anderson, 2005-02-07 In recent years the concepts of individual autonomy

and political liberalism have been the subjects of intense debate but these discussions have occurred largely within separate academic disciplines *Autonomy and the Challenges to Liberalism* contains essays devoted to foundational questions regarding both the notion of the autonomous self and the nature and justification of liberalism Written by leading figures in moral legal and political theory the volume covers inter alia the following topics the nature of the self and its relation to autonomy the social dimensions of autonomy and the political dynamics of respect and recognition and the concept of autonomy underlying the principles of liberalism *International Bibliography of Economics* 1994 British Library of Political and Economic Science at the London School of Economics, 1995 The IBSS is the essential tool for librarians university departments research institutions and any public or private institutions whose work requires access to up to date and comprehensive knowledge of the social sciences **Independence, Propertylessness, and Basic Income** K. Widerquist, 2013-03-07 *Independence Propertylessness and Basic Income* argues that philosophers have focused too much on scalar freedom and proposes a theory of status freedom as effective control self ownership the power to have or refuse active cooperation with other willing people or simply freedom as the power to say no *Philosophical Explorations of Justice and Taxation* Helmut P. Gaisbauer, Gottfried Schweiger, Clemens Sedmak, 2015-01-20 This volume presents philosophical contributions examining questions of the grounding and justification of taxation and different types of taxes such as inheritance wealth consumption or income tax in relation to justice and the concept of a just society The chapters cover the different levels at which the discussion on taxation and justice takes place On the principal level chapters investigate the justification and grounding of taxation as such and the role taxation plays and should play in the design of justice be it for a just society or a just world order On a more concrete level chapters present discussions of these general reflections in more depth and examine different types of taxation tax systems and their design and implementation On an applied level chapters discuss certain specific taxes such as wealth and inheritance taxes and examine whether or not a certain tax should be favored and for what reasons as well as why it is just to target certain kinds of assets or income Finally this volume contains chapters that discuss the central issue of international and global taxation and their relation to global justice *Actual Ethics* James R. Otteson, 2006-06-19 *Actual Ethics* offers a moral defense of the classical liberal political tradition and applies it to several of today's vexing moral and political issues James Otteson argues that a Kantian conception of personhood and an Aristotelian conception of judgment are compatible and even complementary He shows why they are morally attractive and perhaps most controversially when combined they imply a limited classical liberal political state Otteson then addresses several contemporary problems wealth and poverty public education animal welfare and affirmative action and shows how each can be plausibly addressed within the Kantian Aristotelian and classical liberal framework Written in clear engaging and jargon free prose *Actual Ethics* will give students and general audiences an overview of a powerful and rich moral and political tradition that they might not otherwise consider *Neoliberalism and the Biblical Voice* Paul Babie, Michael

Trainor,2017-11-28 This book compares our contemporary preoccupation with ownership and consumption with the role of property and possessions in the biblical world contending that Christian theology provides a valuable entry point to discussing the issue of private property a neoliberal tool with the capacity to shape the world in which we live by exercising control over the planet s resources Babie and Trainor draw on the teaching on property and possessions of Jesus of Nazareth They demonstrate how subsequent members of the Jesus movement the writers of early collection of Jesus sayings called Q and the gospels of Mark and Luke reformulated Jesus teaching for different contexts that was radical and challenging for their own day Their view of wealth and possessions continues today to be as relevant as ever By placing the insights of the Galilean Jesus and the early Jesus movement into conversation with contemporary views on private property and consumer culture the authors develop legal philosophical and theological insights what they describe as seven theses into how our desire for ethical living fares in the neoliberal marketplace *The Global Health Crisis* Thana Cristina de

Campos,2017-03-30 Proposing a new view of global justice based on natural law this book presents a discussion of the key ethical values in contemporary medicine and health notably in relation to neglected diseases like malaria Ebola and Zika The lack of treatments for such diseases points to a global health crisis Thana Cristina de Campos provides a general framework based on global commutative justice for discussion of the ethical responsibilities of international stakeholders mapping the varying duties they have and their content and force She also addresses the urgent need for reforms to the international legal rules on bioethics notably the system of intellectual property rights These ideas will be of interest to those who are looking for a more nuanced view of the human right to health than that provided by advocates in the globalist mainstream

Privacy and Capitalism in the Age of Social Media Sebastian Seignani,2015-08-27 This book explores commodification processes of personal data and provides a critical framing of the ongoing debate of privacy in the Internet age using the example of social media and referring to interviews with users It advocates and expands upon two main theses First people s privacy is structurally invaded in contemporary informational capitalism Second the best response to this problem is not accomplished by invoking the privacy framework as it stands because it is itself part of the problematic nexus that it struggles against Informational capitalism poses weighty problems for making the Internet a truly social medium and aspiring to sustainable privacy simultaneously means to struggle against alienation and exploitation In the last instance this means opposing the capitalist form of association online and offline **Land in the American West** William G.

Robbins,James C. Foster,2011-12-01 Throughout the history of the United States the concepts of land and the West have fired the American imagination and fueled controversy The essays in *Land in the American West* deal with complex troublesome and interrelated questions regarding land Who owns it Who has access to it What happens when private rights infringe upon the public good or when one ethnic group is pitted against another or when there is a conflict between economic and environmental values Many of these questions have deep historical roots They all have special significance in

the modern American West where natural resources are still abundant and large areas of land are federally owned
