 native believed to have fired the first shot against Fort Sumter in 1861 as one of the South s most aggressive fire eaters This
 volume of Ruffin s work offers us his less known but equally intense passion for agricultural study In carefully edited
 selections from Ruffin s writings Jack Temple Kirby presents an innovative progressive agronomist and pioneering
 conservationist Arranged in sections discussing southern agricultural history Ruffin s observations of nature his ideas about
 land reform and his plans for soil rejuvenation Nature s Management shows that Ruffin was a thinker far ahead of his time
 recognizing our need to improve agriculture and to protect nature Known as the father of soil science in the United States
 Edmund Ruffin discovered and solved the problem of soil acidity while still in his twenties and published several papers on
 the subject As the publication of his writing increased Ruffin left his own farming business to pursue his studies This volume

contains a collection of Ruffin's essays on a variety of interrelated subjects From the promotion of fencing and methods of malaria prevention to advocacy of a public works program and the recycling of waste Ruffin's ideas paved the way for the early conservation movement associated with Theodore Roosevelt Gifford Pinchot and others Nature's Management presents Ruffin's activism and innovative genius at its best replacing the image of a southern firebrand with that of an outspoken reformer deserving of recognition *Practical reflections on the nature & treatment of disease ...
