Lange, 2023-03-28 This book lays out the principles and practices of transformative sustainability education using a relational way of thinking and being Elizabeth A Lange advocates for a new approach to environmental and sustainability education that of rethinking the Western way of knowing and being and engendering a frank discussion about the societal elements that are generating climate environmental economic and social issues Highlighting the importance of

Indigenous and life giving cultures the book covers educational theory transformation stories of adult learners social and economic critique and visions of changemakers Each chapter also has a strong pedagogical element with entry points for learners and embodied practices and examples of taking action at micro meso macro levels woven throughout Overall this book enacts a relational approach to transformative sustainability education that draws from post humanist theory process thought relational ontology decolonization theory Indigenous philosophy and a spirituality that builds a sense of sacred towards the living world Written in an imaginative storytelling manner this book will be a great resource for formal and nonformal environmental and sustainability educators Global Capitalism and Climate Change Hans A. Baer,2012-06-28

Many progressive scholars particularly in the social sciences have increasingly come to acknowledge that anthropogenic climate change constitutes yet another contradiction of global capitalism This book constitutes an effort to develop a critical social science of climate change one that posits its roots in global capitalism with its emphasis on profit making a treadmill of production and consumption heavy reliance on fossil fuels and commitment to ongoing economic expansion It explores the systemic changes necessary to create a more socially just and sustainable world system that would possibly start to move humanity toward a safer climate and discusses the role of a burgeoning climate movement in this effort **Canadian Books**

in Print. Author and Title Index ,1975 **End of the World As We Know It** Oliver Lewis Thompson,2009-01-01 The first all round handbook to global climate change Covers the science behind the climate a look at how climate has affected human civilization in the past the possible future effects of climate change in the next millennium and what we can do to minimise this catastrophe Detailed critical readable and stark in its message Climate Change A. Barrie

Pittock,2017-07-28 Is climate change really happening and does it matter The answer from the scientific community is a resounding yes yet debates about the reality of climate change and what measures to take are slowing our response Barrie Pittock one of the world s leading climate researchers argues that we need to act urgently to avoid increasingly severe climate change He looks at the controversy around global warming and other predicted changes examining the scientific basis of the changes observed to date how they relate to natural variations and why the evidence points to larger changes later this century The effect of these changes on our natural systems and our lifestyles will be considerable and could include wild weather shifts in global ocean circulation decreases in crop yields and sea level rises But the impacts won t be distributed evenly some countries will suffer more than others Climate Change Turning up the Heat explains how our attitudes to risk and uncertainty constant companions in life influence our decision making and ultimately how much we and future generations stand to lose from rapid climate change It outlines the current concerns of the major international players and reviews the response to date detailing national interests Importantly it shows there is real hope of managing climate change and minimising the risk of disaster if we step up efforts to develop and apply innovative technological and policy solutions *Spirituality in Social Work and Education* Janet Groen,Diana Coholic,John R. Graham,2013-01-24 Over the past

ten years the fields of social work and education have grappled separately with definitions of spirituality ways to integrate spirituality into the classroom and the rendering of spirituality as a meaningful concept for practitioners students and researchers Social work and education have many commonalities in areas of engagement with children families and communities For the first time this book brings together these two professional disciplines for interdisciplinary discussions that advance our knowledge in the broad area of spirituality The book s three sections reflect broad topic areas created to facilitate dialogue between the contributors all of whom have established expertise in exploring spirituality in education or social work The first section of the book explores the historical and theoretical underpinnings of spirituality in education and social work Examination of our respective heritages uncovers the religious roots within our professions and reveals a present understanding of spirituality that calls for active engagement in challenging oppression and working toward social justice The second section shifts the focus to the pedagogical implications of incorporating spirituality into higher education classrooms The varied level of acceptance and the tensions that come from including spirituality implicitly or explicitly in the programs and coursework in our respective faculties are illuminated by authors in both professions The final section explores issues related to practising and teaching in the field from a spiritually sensitive perspective

Building the Critical Anthropology of Climate Change Hans A. Baer, Merrill Singer, 2024-08-14 This book applies a critical perspective to anthropogenic climate change and the global socio ecological crisis The book focuses on the critical anthropology of climate change by opening up a dialogue with the two main contending perspectives in the field namely the cultural ecological and the cultural interpretive perspectives Guided by these the authors take a firm stance on the types of changes that are needed to sustain life on Earth as we know it Within this framework they explore issues of climate and social equity the nature of the current era in Earth s geohistory the perspectives of the elite polluters driving climate change and the regrettable contributions of anthropologists and other scholars to climate change Engaging with perspectives from sociology political science and the geography of climate change the book explores various approaches to thinking about and responding to the existential threat of an ever warming climate In doing so it lays the foundation for a brave new sustainable world that is socially just highly democratic and climatically safe for humans and other species This book will be of interest to researchers and students studying environmental anthropology climate change human geography sociology and political science

The Politics of Childhoods Real and Imagined Priscilla Alderson, 2015-11-23 The second volume of Priscilla Alderson s popular and renowned book *Childhoods Real and Imagined* relates dialectical critical realism to childhood By demonstrating their relevance and value to each other Alderson presents a practical introductory guide for applying critical realism to research about children and young people Each chapter summarises key themes from several academic disciplines and policy areas ranging from climate change and social justice between generations to neoliberalism social reform and imagining utopias Children s and adults views and experiences are reviewed and whereas the first volume deals with more personal and local

aspects of childhood this volume widens the scope into debates about global politics which so seldom mention children Each chapter demonstrates how children and young people are an integral part of the whole of society and are often especially affected by policies and events This book is written for everyone who is researching studying or teaching about childhood or who cares for and works with children and young people as well as those interested in critical realist approaches **The Anti-Capitalist Dictionary** David E Lowes,2013-07-04 This dictionary is an alternative and a counter balance to the many political dictionaries that ignore or marginalize the history and influence of anti capitalist movements It paints a rich picture of the ideas and issues that inform today s anti capitalist activity The Anti Capitalist Dictionary is organised in an easily accessible alphabetical format with self contained cross referenced entries that introduce and explain concepts and issues that are integral to understanding today s global movement The Dictionary demonstrates how the meaning and relevance of some of these have evolved and illustrates a linkage between past and present activity that might be unfamiliar to people who are involved or interested in the movement s current manifestations This Dictionary has international coverage and will prove invaluable to students of politics as well as to activists and the general reader **The Orphaned Land** V. B. Price,2011-11-16 In this work the author presents New Mexico as a microcosm of global ecological degradation He states that the New Mexico environment is endangered by military corporate and urban polluters and consumers as hazardous waste munitions testing radioactive emissions and other issues affect the land water and air The author assembles his information in part from newspaper articles and government reports Storytelling and Ecology Anthony Nanson,2021-06-17 Finalist in the PROSE Award 2022 for Language Linguistics Awarded Honors at the Storytelling World Awards 2022 Linking the ongoing ecological crisis with contemporary conditions of alienation and disenchantment in modern society this book investigates the capacity of oral storytelling to reconnect people to the natural world and enchant and renew their experience of nature place and their own existence in the world Anthony Nanson offers an in depth examination of how a diverse ecosystem of oral stories and the dynamics of storytelling as an activity can catalyse different kinds of conversation and motivation helping us resist the discourse of powerful vested interests Detailed analysis of traditional true life and fictional stories shows how spoken narrative language can imbue landscapes creatures and experiences with enchantment and mediate between the inner world of consciousness and outer world of ecology and community A pioneering ecolinguistic and ecocritical study of oral storytelling in the modern world Storytelling and Ecology offers insight into the ways that sharing stories in each other s embodied presence can open up spaces for transformation in our relationships with the ecological world around us *Global Justice and Neoliberal Environmental Governance* Chukwumerije Okereke,2007-09-03 This book is an ethical critique of existing approaches to sustainable development and international environmental cooperation providing a detailed and structured account of the tensions normative shifts and contradictions that currently characterize it With specific focus on three environmental regimes the volume explores the way various

notions of justice feature both implicitly and explicitly in the design of global environmental policies. In so doing, the dominant conceptions of justice that underpin key global environmental policies are identified and criticised on the basis of their compatibility with the normative essence of global sustainable development. Global Justice and Neoliberal Environmental Governance demonstrates that whilst moral norms inflict far greater impact in regime development than is currently acknowledged by orthodox approaches to regime analysis, the core policies remain rooted in two neo-liberal interpretations of justice which undermine the ability to achieve sustainable development and international justice. It will appeal to students and scholars of politics, philosophy, international relations, geography and law.

Connecting Spirituality and Social Justice
Michael J. Sheridan, 2016-04-08

Jim Wallis, well-known justice advocate and author, has stated that the two great hungers in the world today are for spirituality and social justice. Although social work and related fields have increasingly recognized the importance of addressing spirituality within clinical practice, less attention has been paid to the role of spirituality in promoting social justice or supporting social change within macropractice. The contributions in this edited collection highlight current developments in this area, including emerging conceptual frameworks, practice applications, and research findings. Theoretical approaches to understanding the link between spirituality and justice are explored in analyses of alternative models of social justice and justice orientations of major faith traditions. The critical role of spirituality in larger system change is illustrated through exemplars of research on vulnerable populations, community practice, legislative advocacy, development of social movements, and ecological social work. The importance of including content on religion and spirituality in professional curricula is explored through research on students' attitudes toward spirituality and social advocacy. Noting the resonating themes within all of these contributions, the volume concludes with an overview of emerging principles for spiritual activism. This book aims to stimulate further development in the vital connection between spirituality and social justice. It was originally published as a special issue of the *Journal of Religion, Spirituality in Social Work*.
