No More Secondhand God R. Buckminster Fuller, 1967-04-01 Vernon Sternberg of the S I U Press was responsible for bringing out the first edition of this collection of occasional pieces In addition to the title piece written in 1940 it includes other blank verses Machine Tools 1940 The Historical Attempt by Man to Convert His Evolution from a Subjective to an Objective Process 1948 Universal Requirements of a Dwelling Advantage 1917 62 The Fuller Research Foundation 1946 51 A Comprehensive Anticipatory Design Science 1956 and two prose essays with geometrical diagrams and tables Introduction to Omnidirectional Halo 1959 and omnidirectional Halo 1960 I once asked Fuller whether No More Secondhand God meant secondhand as in clothes or second hand as in watch He seemed bemused by the question and answered with a casualness I found suspect Now that you mention it he said I suppose both Description by Ed Applewhite courtesy of The Estate of Buckminster Fuller No More Secondhand God, and Other Writings Richard Buckminster Fuller, 1969 **No More Secondhand God and Other Writings** Richard Buckminster Fuller (Ingénieur), 1971 **No More Secondhand God** R. Buckminster Fuller, 19?? *The Politics of the Artificial* Victor Margolin, 2018-01-11 Emerging from the world of commercial art and product styling design has now become completely integrated into human life Its marks are all around us from the chairs we sit on to the Web sites on our computer screens One of the pioneers of design studies and still one of its most distinguished practitioners Victor Margolin here offers a timely meditation on design and its study at the turn of the millennium and charts new directions for the future development of both fields Divided into sections on the practice and study of design the essays in *The Politics of the Artificial* cover such topics as design history design research design as a political tool sustainable design and the problems of design s relation to advanced technologies Margolin also examines the work of key practitioners such as the matrix designer Ken Isaacs Throughout the book Margolin demonstrates the underlying connections between the many ways of reflecting on and practicing design He argues for the creation of an international interdisciplinary field of design research and proposes a new ethical agenda for designers and researchers that encompasses the responsibility to users the problems of sustainability and the complicated questions of how to set boundaries for applying advanced technology to solve the problems of human life Opinionated and erudite Victor Margolin s *The Politics of the Artificial* breaks fresh ground in its call for a new approach to design research and practice Designers engineers architects anthropologists sociologists and historians will all benefit from its insights **The Films of Charles and Ray Eames** Eric Schuldenfrei, 2014-12-05 *The Films of Charles and Ray Eames* traces the history of the Eameses work examining their evolution away from the design of mass produced goods and toward projects created as educational experiences Closely examining how the Eameses described their work reveals how the films and exhibitions they generated were completely at odds with the earlier objectives exemplified in their furniture designs Shifting away from promoting the consumer culture they turned their attention to the presentation of complex sets of scientific artistic and philosophical ideas During a critical

period from the late 1950s to the early 1960s there was a moment of introspective self reflection in the West stemming from the events of the Cold War This moment of uncertainty was crucial for it provided the incentive to question the values and concerns of society as a whole In turn designers began to question their own sense of purpose temporarily expanding the purview of design to a broader field of inquiry In the case of the Eameses they identified an overriding problem related to consumerism and excess in America and sought to resolve the issue by creating a network of communication between universities governments institutions and corporations The solution of promoting greater education experiences as an alternative to consumerism in America required that different sectors of society functioned in unison to address political social economic and educational concerns The Films of Charles and Ray Eames reconsiders how design intersects with humanity culture and the sciences

Dialectical Theology and Jacques Ellul Jacob E. Van Vleet, 2014 Argues that the work of Jacques Ellul is frequently and deleteriously misread on account of inattention to the theological underpinning that governs Ellul's thought Van Vleet provides a substantive account of the theological structure of Ellul's work and demonstrates the determinative role that theology especially dialectical theology plays in a proper understanding of Ellul Provided by publisher

A-Z Guide to Modern Social and Political Theorists Professor Stuart Sim, Noel Parker, 2014-06-03 The A Z Guide to Modern Social and Political Theories is a companion volume to the already published A Z Guide to Modern Literary and Cultural Theorists It ranges widely through the social sciences and related areas to identify thinkers who have had a major impact on the development of modern social and political theory and given clear accessible summaries of their work While the accent is on the later twentieth century several up and coming theorists are included to ensure a contemporary edge to the volume classic names in the field from the earlier twentieth century are not neglected and the collection also delves back into the nineteenth century for such founding figures of the social sciences as Marx and Comte The volume is therefore both up to date and mindful of the sources of modern debates
