Education Systems in Historical, Cultural, and Sociological Perspectives Daniel Tröhler,Ragnhild Barbu,2012-03-26 For nearly half a century research on education systems has been increasingly popular However this popularity was long restricted

primarily to internationally linked policy makers and education planners often backed up by international organizations such the OECD but also by governmental or para governmental organizations within the individual countries These institutional affiliations provided education research with a specific character that often centres on notions such as excellence efficiency or standards The specific comparative character of this policy driven research agenda triggered the development of suitable research techniques such as comparative statistics and pertinent sub disciplines such as cognitive psychology Backed up by powerful global institutions this agenda purported to be rather unique and it tended to ignore the cultural complexity of the educational field and those research approaches that address this complexity This volume includes different historical cultural and sociological approaches to the education systems and to questions as to how research on education systems can be undertaken beyond the parameters of the existing research agenda They demonstrate how pertinent problems of research on education systems can only be tackled taking an international and interdisciplinary approach with regard to both research questions and methods concerning education systems

Persistence and Emergencies of Inequalities in Latin America Pablo Vommaro,Pablo Baisotti,2022-02-21 This book adopts a multidimensional approach to analyze both the historical and emerging factors that contribute to make Latin America and the Caribbean the most unequal region in the world Social inequality is a historical characteristic of the region but at the beginning of the 21st century a handful of progressive governments seemed to be adopting policies that could reduce this historical trend Many of these efforts however were blocked or reversed by the COVID 19 pandemic which both exposed the persistence of historical trends and contributed to the emergency of new forms of inequality in the region The different chapters in this contributed volume adopt a multidimensional intersectional perspective to analyze both the persistence and the emergency of social devices of production and reproduction of inequalities in the diverse Latin American and Caribbean temporal spatialities The issues analyzed in the different chapters revolve around four main axes a persistence of generational and intergenerational inequalities b structural gender inequality c intertwined social inequalities race class and social structure and c historical and economic dimension of inequality Persistence and Emergencies of Inequalities in Latin America A Multidimensional Approach will be of interest to researchers interested in the study of social inequality and social
