Non-Volatile Memory Database Management Systems Joy Arulraj,Andrew Pavlo,2022-06-01 This book explores the implications of non volatile memory NVM for database management systems DBMSs The advent of NVM will fundamentally change the dichotomy between volatile memory and durable storage in DBMSs These new NVM devices are almost as fast as volatile memory but all writes to them are persistent even after power loss Existing DBMSs are unable to take full advantage of this technology because their internal architectures are predicated on the assumption that memory is volatile With NVM many of the components of legacy DBMSs are unnecessary and will degrade the performance of data intensive applications We present the design and implementation of DBMS architectures that are explicitly tailored for NVM The book focuses on three aspects of a DBMS 1 logging and recovery 2 storage and buffer management and 3 indexing First we present a logging and recovery protocol that enables the DBMS to support near instantaneous recovery Second we propose astorage engine architecture and buffer management policy that leverages the durability and byte addressability properties of NVM to reduce data duplication and data migration Third the book presents the design of a range index tailored for NVM that is latch free yet simple to implement All together the work described in this book illustrates that rethinking the fundamental algorithms and data structures employed in a DBMS for NVM improves performance and availability reduces operational cost and simplifies software development **High Performance Computing Systems and Applications** Jonathan Schaeffer,2012-12-06 Major advances in computing are occurring at an ever increasing pace This is especially so in the area of high performance computing HPC where today s supercomputer is tomorrow s workstation High Performance Computing Systems and Applications is a record of HPCS 98 the 12th annual Symposium on High Performance Computing Systems and Applications The quality of the conference was significantly enhanced by the high proportion of keynote and invited speakers
