The Selected Works of Andrew Lang Andrew Lang, When the learned first gave serious attention to popular ballads from the time of Percy to that of Scott they laboured under certain disabilities The Comparative Method was scarcely understood and was little practised Editors were content to study the ballads of their own countryside or at most of Great Britain Teutonic and Northern parallels to our ballads were then adduced as by Scott and Jamieson It was later that the ballads of Europe from the Faroes to Modern Greece were compared with our own with European M rchen or children s tales and with the popular songs dances and traditions of classical and savage peoples The results of this more recent comparison may be briefly stated Poetry begins as Aristotle says in improvisation Every man is his own poet and in moments of strong emotion expresses himself in song A typical example is the Song of Lamech in Genesis I have slain a man to my wounding And a young man to my hurt Instances perpetually occur in the Sagas Grettir Egil Skarphedin are always singing In Kidnapped Mr Stevenson introduces The Song of the Sword of Alan a fine example of Celtic practice words and air are beaten out together in the heat of victory In the same way the women sang improvised dirges like Helen lullabies like the lullaby of Danae in Simonides and flower songs as in modern Italy Every function of life war agriculture the chase had its appropriate magical and mimetic dance and song as in Finland among Red Indians and among Australian blacks The deeds of men were chanted by heroes as by Achilles stories were told in alternate verse and prose girls like Homer s Nausicaa accompanied dance and ball play priests and medicine men accompanied rites and magical ceremonies by songs These practices are world wide and world old The thoroughly popular songs thus evolved became the rude material of a professional class of minstrels when these arose as in the heroic age of Greece A minstrel might be attached to a Court or a noble or he might go wandering with song and harp among the people In either case this class of men developed more regular and ample measures They evolved the hexameter the laisse of the Chansons de Geste the strange technicalities of Scandinavian poetry the metres of Vedic hymns the choral odes of Greece The narrative popular chant became in their hands the Epic or the mediaeval rhymed romance The metre of improvised verse changed into the artistic lyric These lyric forms were fixed in many cases by the art of writing But poetry did not remain solely in professional

and literary hands The mediaeval minstrels and jongleurs who may best be studied in L on Gautier s Introduction to his Epop es Fran aises sang in Court and Camp The poorer less regular brethren of the art harped and played conjuring tricks in farm and grange or at street corners The foreign newer metres took the place of the old alliterative English verse But unprofessional men and women did not cease to make and sing Alfred Tennyson Andrew Lang,2021-12-02

Reports Made to the Senate and House of Representatives of the State of Illinois Illinois,1874 **Thomas Salmon: Writings on Music** Benjamin Wardhaugh,2017-07-05 This is the second volume in a two part set on the writings of Thomas Salmon Salmon 1647 1706 is remembered today for the fury with which Matthew Locke greeted his first foray into musical writing the Essay to the Advancement of Musick 1672 and the near farcical level to which the subsequent pamphlet dispute quickly descended Salmon proposed a radical reform of musical notation involving a new set of clefs which he claimed and Locke denied would make learning and performing music much easier these writings are the subject of Volume I Later in his life Salmon devoted his attention to an exploration of the possible reform of musical pitch He made or renewed contact with instrument makers and performers in London with the mathematician John Wallis with Isaac Newton and with the Royal Society of London through its Secretary Hans Sloane A series of manuscript treatises and a published Proposal to Perform Musick in Perfect and Mathematical Proportions 1688 paved the way for an appearance by Salmon at the Royal Society in 1705 when he provided a demonstration performance by professional musicians using instruments specially modified to his designs This created an explicit overlap between the spaces of musical performance and of experimental performance as well as raising questions about the meaning and the source of musical knowledge similar to those raised in his work on notation Benjamin Wardhaugh presents the first published scholarly edition of Salmon s writings on pitch previously only available mostly in manuscript

New Babylon New Nineveh Charles Von Onselen,2012-11-15 Available again in a single volume New Babylon New Nineveh explores the past struggles of everyday people on the Witwatersrand South Africa 1886 1914 This was a period of extraordinary social political and economic change Charles van Onselen examines a host of practices processes and problems which in many ways make for startling comparisons with modern day South Africa Van Onselen investigates the pervasive but highly problematic use of alcohol and prostitution which were used to control both black and white mine workers by the state and the mine owners This exploitation of the lifestyle of the single miners later gave way to the official encouragement of working class family life This gave rise to the advent of domestic servants and the introduction of a systematic programme of suburbanisation and cheap public transportation We see how not even these developments were able to protect the poorest and weakest South Africans of the time Van Onselen explains how Afrikaner unemployment and an affinity for trade unionism were paralleled by further marginalisation black unemployment and the resultant formation of prison gangs which flourish even to the present day
